Delivering Open Source Solutions to the Enterprise

"MIGRATE TO SUGAR6" PROGRAM AND COSTS

The Migrate to Sugar 6 program is available for all users of SugarCRM version 4.5.1 or higher. The program allows customers to leverage the new features in Sugar 6, while keeping their legacy of data, users, security roles, teams, logic hooks and upgrade-safe customizations. Even in cases where previous customizations have not been implemented in an upgrade-safe manner, Levementum has a fixed price assessment and design review for these items, to ensure that these customizations are accounted for.
Customer migrations usually can be accomplished within 1-3 business days.

WHY MIGRATE TO SUGAR6?

1. Sugar 6 delivers a clean, bold look with simplified default views, inline filtering and one-click actions conform to the multitasking environment common to busy sales people.
2. Building upon its reputation as the most flexible CRM on the market, Sugar 6 empowers users with the ability to view and consume data and applications from nearly any source, thanks to the ultra-flexible Sugar 6 platform.
3. As a leader in open source, SugarCRM sets the bar in the business applications industry for offering users freedom and choice in deploying and managing their CRM. Sugar 6 is designed to run on any cloud service platform or on-premise operating system.
