News Category : PressRelease

The largest glass recycling and CRT processing facility in North America increases productivity and precision tracking with Silvanus360 state of the art software by Zylog.

(PRWEB) September 24, 2010 -- Advanced tracking software and ISO standard procedures improve performance and provide assurance for responsible recycling.

Cali Resources is the premier CRT and glass-to-glass processing facility in North America. By leveraging locations in San Diego, Tijuana, Calexico and Mexicali, Cali Resources is able to provide the highest form of recycling at the lowest labor costs.

Cali Resources utilizes a million square foot facility to process the enormous volume received weekly from other recyclers nationwide. The facility is the largest CRT, Monitor, and Display Devices dismantling and glass-to-glass processing facilities in the world. This enormous plant boasts a completely self-contained water treatment facility.

As a pioneer for end-to-end tracking from point of collection to ultimate reuse of the CRTs and Display Devices, Cali Resources has collaborated with Zylog Systems Ltd to design and use software that supports ISO standards and complete transparency of this process for customers.

Silvanus360 by Zylog Systems Ltd provides a network framework to connect collectors with recyclers and downstream processors. The software enables tracking from point of collection, collection event logs, and consumer drop off through receiving, processing, and shipments for reuse. Silvanus360 provides enhanced visibility for business-to-business client tracking for responsible recycling and downstream management.

"When we installed Silvanus360 and modified our workflow, it was as if somebody unclogged the processes," said Carlos Kelvin, President of Cali Resources. "We are able to accommodate all regulations and exceed customer expectations. Our improved performance resonates with our clients in the form of lower costs for processes that are enforced and visible."

Carlos Kelvin, President of Cali Resources, has more than 15 years of experience providing full service recycling and asset recovery for electronic, electrical equipment, computers, storage devices, monitors, televisions, image display devices, and peripherals. Carlos has also been a featured speaker and noted panelist for best practices in recycling.

Silvanus360 by Zylog Systems Ltd is a comprehensive software solution that

includes CRM, Order Management, Event Management, Dispatch, Receiving, Tear Down tracking, Attribute tracking, Warehouse Management, Process Control Management, Performance Reporting, and Shipping. Silvanus360 enables collectors and transportation vendors to collaborate with the recycler for end-to-end visibility and traceability. The simplified SKU management design allows the recycler to configure the application to the needs of the user.

Cali Resources and Zylog Systems Ltd will be demonstrating this powerful software at the E-Scrap Conference. Visitors to the conference will be able to see unique user interfaces that have been designed for optimum workflow management, including iPad, iPhone, and Netbook computers. Visitors will also be able to see the client monitoring with real time online updates.

About Zylog Systems (Canada) Ltd Zylog Systems (Canada) Ltd is a wholly owned subsidiary of Zylog Systems Limited ("ZSL"), a global company with locations throughout the US, Canada, India, Asia Pacific and Europe. ZSL develops and supports a broad range of industry specific and customer enterprise business applications through a proven delivery model that combines local consulting and delivery centres with highly scalable and cost-effective offshore development and testing facilities. In February 2010, Zylog acquired Brainhunter, with its headquarters in Toronto, Canada. Zylog is a recognized leader in contract and permanent staffing, payroll processing services, recruitment automation solutions, project-based ISO certified teams and outsourcing solutions. Zylog services are delivered on an international scale from our Toronto, Ottawa and Montreal offices.
