

Zylog Earns Prestigious Recognition on the InformationWeek 500 List of Top Technology Innovators

Value Added Research & Development and Eco-Friendly Computing places Zylog Systems Ltd among the Top 250 of the InformationWeek Technology Innovators.

Toronto, ON ([PRWEB](#)) September 23, 2010 -- InformationWeek spotlights the power of innovation in information technology, rather than simply identifying the biggest spenders.

“For 22 years, the InformationWeek 500 has honored the most innovative users of business technology,” said InformationWeek Editor In Chief Rob Preston. “As we start to emerge from the worst recession in decades, the IT focus is now on driving growth—new sources of revenue, new relationships with customers, even new business models. This year’s ranking placed special emphasis on those companies and business technology executives leading that charge.”

Zylog Systems Ltd (ZSL Inc), a leading ISV and Global Systems Integrator, was recognized for Consulting and Business Services. Zylog is a pioneer in ‘Eco-Friendly’ computing solutions as a direct result of business aligned R&D and innovative ways to fusion the Cloud, Enterprise Mobile, and VDI technologies with Green IT initiatives.

As IT budgets are slightly alleviated from the cost cutting measures of one year ago, new trends are emerging to empower employees and utilize business intelligence. 72% of technology innovators are using wiki’s, blogs, and social networking to interact with customers, suppliers, and partners. Zylog offers a unique knowledge management suite developed on a Sharepoint platform to leverage integrated business intelligence, processes, blogs, wikis, and data mining.

InformationWeek identifies and honors the United States' most innovative users of information technology with its annual 500 listing and also tracks the technology, strategies, investments and administrative practices of America’s best-known companies. Top winners have included: CME Group, Conway, National Semiconductor, Kimberly-Clark, Hilton Hotels and Unum. The InformationWeek 500 rankings are unique among corporate rankings as it spotlights the power of innovation in information technology, rather than simply identifying the biggest IT spenders.

The InformationWeek Business Technology Network provides IT executives with unique analysis and tools that parallel their work flow – from defining and framing objectives through to the evaluation and recommendation of solutions. Anchored by InformationWeek, the multimedia powerhouse that looks across the enterprise, the network scales across the most critical technology categories with online properties like DarkReading.com (security), IntelligentEnterprise.com (application architecture), NetworkComputing.com (networking and communications) and PlugintotheCloud.com (cloud computing). The network also provides focused content for key IT audiences, such as CIOs, developers, SMBs and IT Support Managers via InformationWeek Global CIO, Dr. Dobb's, InformationWeek SMB, and HDI respectively, as well as vital vertical industries with InformationWeek Financial Services, Government and Healthcare sites. Content is at the nucleus of our information distribution strategy, and the network provides a deep and rich portfolio of decision-making tools and peer based research through InformationWeek Analytics, the leading service for peer-based IT research and analysis. IT professionals turn to our experts and communities to stay informed, get advice and research technologies to make strategic business decisions. The InformationWeek Business Technology Network is part of UBM TechWeb.
