

CLEAN SYSTEMS WHILE RUNNING PRODUCTION

OVERVIEW

A long life, preventative maintenance and light duty system cleaner, in addition to functioning as a long term heat transfer fluid. DuraClean is the perfect preventative maintenance tool. It is capable of running in systems up to 550°F, is odorless and easily handles long term operation while seamlessly allowing production to continue uninterrupted for a complete oil cycle.

DURACLEAN IS A NO DOWNTIME SYSTEM CLEANER THAT UTILIZES THE LATEST IN ADDITIVE TECHNOLOGY.

DuraClean is the ideal system cleaner and perfect preventative maintenance tool. Capable of running in systems up to 550°F, it is odorless and easily handles long term operation while seamlessly allowing production to continue uninterrupted.

Compatible with most system fluids it will effectively dissolve and consume sludge and carbon build-up in minimal time but remains effective and can stay in the system for a full oil cycle. Simply fill a system and run production as usual.

DuraClean's technology was developed originally for the heat transfer industry but can be concentrated and adapted to many applications such as compressors, hydraulic systems, gear boxes, molds, dies, etc.

Typical Properties	DuraClean
Maximum Use Temperature	550°F
Viscosity cSt @ 104°F	44.6cSt
Viscosity cSt @ 212°F	7.0cSt
Flash Point °F	465°F
Fire Point °F	497°F
Auto-Ignition Point °F	688°F
