- Aleratec "Fast Keys" for one touch access to common functions
- DVD-ROM drive for fast, on-the-fly copies
- Laser etched high-quality disc labels with no ink cartridges, toner or ribbons

Standalone LightScribe Disc Publishing

Aleratec's new 1:3 DVD/CD LightScribe Duplicator SA is a standalone LightScribe disc publishing system that simultaneously produces up to 3 DVD/CD copies or clearly labeled discs with just a few button pushes. It features a simple, intuitive interface that includes 4 instant-access "Fast Keys" for common functions including PC-Connect and Source Selection. In PC-Connect mode, it can be connected to a PC via USB2.0 cable for access to the duplicator's internal hard drive. Users can simply drag and drop disc image and label files directly into the duplicator and be running duplication jobs in no time. This duplicator also has a dedicated Source drive, allowing the device to make disc-to-disc copies without sacrificing any write capacity. You can burn the same number of discs whether burning from the hard drive or from another source disc.

1:3 DVD/CD LightScribe Duplicator SA™
