WebLOQ Selected to Present Innovative Security Solution in Washington, D.C. at SINET Showcase 2010

SINET Showcase Aligns Leading Cyber-Security Solutions with the Critical Needs of Today's Federal and Commercial Markets

Monterey, Calif. – October 6, 2010– WebLOQ, Inc., a leader in privacy solutions for secure and compliant business communications, today announced its selection as a key presenter within "Showcase 2010" of the Security Innovation Network™ (SINET) Conference at the National Press Club in Washington, D.C. on October 26-27. SINET, an organization focused on advancing cyber-security innovation through public-private collaboration, offered early-stage and emerging growth companies an opportunity to apply to present their cyber-security solutions at the SINET Showcase. WebLOQ's secure email solution was the only vendor of its kind to be selected to present to this year's audience of key government and commercial market contacts.

WebLOQ and its solution, LOQMail, participated in the rigorous two-stage evaluation and selection process overseen by a blue-ribbon vetting committee comprised of more than 40 security experts and senior government executives. Out of 130 submissions, WebLOQ was selected as one of twenty promising solution providers to present its technology to an audience of representatives from the Federal government, private industry, system integration, research institutions, venture capital and investment banking communities. WebLOQ will present its highly secure email solution to all conference attendees on October 27 and will be featured within an exhibit station at the conference.

"SINET's mission is to align technology innovation with critical needs of the federal and commercial markets," said Robert Rodriguez, chairman and founder of SINET. "We are honored to have WebLOQ participate in the SINET Showcase 2010 as their LOQMail solution focuses on secure communications and safe document transfer that are paramount to the Federal, civilian, defense and intelligence agencies, as well as the commercial sector."

LOQMail is ideal for the government sector. Unique in its delivery, LOQMail provides state of the art double-encryption to the entire email, including the subject line, email body, attachments and recipient details. LOQMail messages are transmitted over the standard Internet, using WebLOQ's private network of domains that are shielded from spam, phishing and other malware.

"The government sector represents a key market for WebLOQ. Our inclusion within SINET's 2010 Showcase is a great honor and opportunity to raise the awareness of the company, the

need of our secure email technology, and pave the way for the adoption and deployment across multiple government agencies," said George Sidman, chief technical architect and co-founder of WebLOQ.

About the Security Innovation Network™ (SINET)
The Security Innovation Network was created to increase collaboration between public and private sectors in the U.S. with the goal of accelerating innovation in security technology, practices and implementation. The SINET, founded by former Secret Service Agent Robert Rodriguez, focuses on advancing IT security innovation by promoting opportunities for collaboration between federal agencies, system integrators, innovators, entrepreneurs, venture capitalists, academics and scientists. About WebLOQ
WebLOQ enables secure, private and compliant electronic communications. Combining revolutionary technology with unrivaled ease-of-use, WebLOQ's suite of LOQMail solutions simply integrate directly into users' email to provide a trusted communications channel to ensure that sensitive email, documents and personal information is delivered and received only by the intended recipients. Emails sent via LOQMail are protected with state of the art double-encryption and are transmitted over WebLOQ's private network of domains that are shielded from spam, phishing, and malware for comprehensive security. Its flagship products include a secure read-only functionality to correspond with non-subscribers and auditable reports that trace delivery confirmations with an individual tracking number to easily demonstrate compliance to regulators and facilitate eDiscovery.

LOQMail is successfully helping organizations across financial services, insurance, healthcare, legal, accounting, government, defense and law enforcement gain the cost savings and efficiencies of email, while making sure that sensitive correspondence is compliant with growing national and state privacy regulation. WebLOQ is headquartered in Monterey, CA and more information is available at www.webloq.com , or by calling (888) 815-0008.
