

ActiveState Komodo® IDE

The professional IDE for Python, PHP, Ruby, JavaScript, Perl and Web development.

The Professional IDE for Windows, Mac and Linux

Whether you develop for Windows, Mac, Linux--or all three--Komodo is a fast, full-featured IDE you can rely on. Komodo IDE comes with a wealth of features to help you get your development work done faster, while staying out of your way so you can focus on your code.

Per User Licensing

Komodo IDE has a per user licensing model so your license includes installers for all supported platforms. You can install Komodo on all the computers you use.

Built for Teamwork

Software development teams need tools that help them collaborate and manage change. Komodo IDE's shared toolbox provides an easy interface for sharing macros, code snippets, commands, templates and links between team members. Integration with SVN, Git, Mercurial, CVS, Bazaar, or Perforce lets you choose the source control management software that suits your team best. Having common source control commands available from the editor helps encourage good SCM practices.

Get your development work done faster with Komodo IDE.

“Komodo IDE is the Swiss army knife of web development. It’s quite possibly the coolest thing to happen to scripting languages since, well, ever.”

*Issac Goldstand
Founder, Mirimar Networks*

"The increase in productivity I got from the interactive debugging environment in Komodo IDE probably saved me more than the purchase price within 48 hours."

Graeme Robinson
Memex Inc.

AWARDS

ActiveState

The Dynamic Language Experts

ActiveState Komodo® IDE

The professional IDE for Python, PHP, Ruby, JavaScript, Perl and Web development.

FEATURES

Editing

Autocomplete, calltips and syntax checking for:

- » browser-side languages: HTML, CSS, JavaScript and XML
- » server-side languages: PHP, Python, Ruby, Perl and Tcl
- » web template languages: Django, Rails, Template-Toolkit, Smarty and more

Code Browsing

- » DOM Viewer for HTML and XML
- » Code Browser for a multi-file tree view
- » Sections List for quick navigation

Syntax Highlighting for Over 100 Languages

Code Folding

Multi-language Buffers

Code Snippets and Abbreviations

Multi-document Editing

Language-specific Code Formatters

Customizable Color Schemes

VI Emulation

Column Editing

HTML Preview

Multi-lingual Input Method Editor (IME) Support

Debugging

Python, Ruby, PHP, Perl and Tcl

Interactive Shells

Variable Viewer

Breakpoints Manager

Multi-session

Multi-language

CGI Emulation

Remote Debugging

And More...

Source Control Integration:

- » support for Subversion, Git, Mercurial, Bazaar, CVS and Perforce
- » file status indicators and updates
- » checkout wizard
- » multi-file commit
- » diff viewer
- » revision history

Projects & Places

- » file management in a sidebar
- » settings and tools for specific tasks or groups of files

Tools & Toolboxes

- » macros (JavaScript or Python) for adding features and automation
- » saved commands for integrating with the OS and external tools
- » snippets and templates for commonly used code
- » URLs, custom toolbars and custom menus
- » project-specific and shared toolboxes
- » Invoke Tool interface for quickly launching tools

Remote Files & Publishing

- » edit files on remote systems via FTP, FTPS, SFTP, or SCP
- » publish, pull or synchronize groups of local and remote files

Search & Replace

- » current selection, current document or across multiple files
- » multi-line and regular expression support

Database Explorer

- » browse database structure in a sidebar
- » view tables and run queries

Rx (Regular Expression) Toolkit

- » Build complex regular expressions and watch how they operate on any given text sample.

Rx (Regular Expression) Toolkit

HTTP Inspector

Unit Testing Integration

Firefox Style Add-ons

Perl Dev Kit and Tcl Dev Kit

Integration

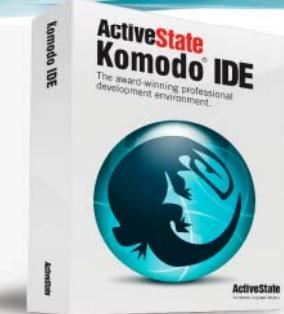

Minimum System Requirements

Hardware Requirements

- x86 or x86_64 architecture
- 1 GHz or faster processor
- 1 GB RAM
- 200 MB hard disk space

Software Requirements

- Windows XP or later
- Mac OS X 10.4 or later
- Linux 2.6 with at least:
 - glibc 2.4
 - libstdc++ 6
 - GTK+ 2.10

ActiveState

The Dynamic Language Experts

About ActiveState

ActiveState is the world leader in enabling companies to develop, manage, and distribute applications with dynamic languages. The company's products and services for Perl, Python, Tcl and other web languages, are used by over 2 million developers and 97% of the Fortune 1000 to build and run applications from mission-critical to open source projects. ActiveState's end-to-end solutions include development tools, language distributions, indemnification, OEM solutions, support and other services. With these, customers such as Cisco, CA, HP, Bank of America, Siemens, and Lockheed Martin are able to accelerate productivity, minimize risk, and ensure compliance.
