

MessageWatcher® – E-mail Archiving and Surveillance

E-mail • Instant Messages • Tweets • Facebook Postings • LinkedIn Updates

Solutions for regulatory compliance, eDiscovery or simply reducing the risk inherent in employees' electronic communication.

MessageWatcher Addresses

Compliance Requirements:

- Federal Rules of Civil Procedure
- Identity Theft / FTC Red Flag
- Sarbanes-Oxley
- The Gramm-Leach-Bliley Act
- Anti-Money Laundering (AML)
- SEC 17a-4
- HIPAA Privacy Rule
- PCI Compliance

Importing your old e-mail into MessageWatcher is no problem; we import .edb, .eml, .pst files or existing archiving files. We have imported existing e-mail files for clients ranging in size from 1 Gigabyte to 1.5 Terabytes.

MessageWatcher saved a small investment advisory firm over \$10,000 in legal fees related to just one legal discovery request.

Prevent lawsuits & fines related to

Illegal Activity
Regulatory Violations
Sexual Harassment
Discrimination
Workplace Violence

Prevent employee theft of

Intellectual Property
Customer Lists
Financial Records
Data from Clients
Research & Development

If your organization is hit with audits, discovery requests, subpoenas or similar demands for e-mail then you need a tool that will allow you to import old e-mail backup files, archive current e-mail, and provide an ongoing repository that is scalable, easily searchable and affordable. You need MessageWatcher.

Archiving

- Hosted archive of e-mail
- SAS 70 compliant facility and fully PCI compliant
- Social networking site updates can be packaged as e-mails so they reside in the same archive
- Unlimited storage
- Audit trails provide comprehensive activity logs
- Audits, lost data, data mining made easy with the archive and its associated search capabilities
- Real-time data as opposed to point-in-time backups
- Advanced search options speed information retrieval process
- Flexible reporting options to create automatic or ad hoc reports
- Definable retention policies based on content
- Multiple access levels for employees, compliance officers, corporate officers, legal department, etc.
- Highly scalable

Surveillance

- Automatically scan for words and phrases using open and customizable policies
- Open and definable rule sets
- Scan and view attachments
- Quarantine policy-violating e-mails
- Monitor external & internal e-mail
- Route flagged messages
- Monitor multiple languages
- Automatically encrypt e-mails that contain certain words or phrases
- Review and administer based on groups
- Pre- or post-review definable by group, user or keyword for e-mail
- Store comments & notes along with e-mails
