## CAI Networks
## WebMux™ Load Balancers
### *What Our Customers Have to Say*

"As a premier provider of mission critical hosting services to Corporate America and Government entities, products that meet our clients demanding security and reliability needs are crucial to ensure there is no interruption or derogation of the services they provide. Products such as CAI Networks feature-rich WebMux Load Balancers coupled with an affordable price and superior support are key components in meeting our requirements  We work with trusted suppliers such as AVANU®, who not only have a keen customer-centric focus but are technically savvy and undestands both our and our customers' needs."

Vice-President of Technology
MIS Sciences Corporation, Hosting Services
(October 2010)

"As a Microsoft® Gold Partner with specialization in Unified Communications and Voice, Convergent is constantly implementing Office® Communications Server 2007 R2, now Lync™ Server 2010, and Exchange 2010 in complex, highly-available environments.  AVANU® has been instrumental in supplying CAI's WebMux platform to Convergent.  Our engineering team can quickly add advanced communication and collaboration capabilities and processes, at a good value for our customers"

Director of Operations
Convergent Solutions Group, Microsoft® Gold Partner
(October 2010)

"Our web business grew rapidly from 1 to 50 servers - purchasing a WebMux made this growth, and ongoing maintenance incredibly straightforward.  We have 3 now and the original WebMux is still up without failure 6 years later!  Overall, a cost effective, easy to manage solution for any size business."

Technical Director
World Careers Network PLC, E-Recruitment Software Developer
(February 2007)

"WebMux was a dream to set up - it took five minutes from box to operation.  It is very easy of use.  We've received excellent support from both CAI and AVANU."

Administrator
LeadClick Media, On-line media advertising
(July 2004)

"We configured the WebMux units three years ago and have never had to do anything to them or with them. They work flawlessly.  As nothing has ever been wrong with the WebMux units, we have never had to do any upgrades. AVANU is great about keeping us updated on things they think we might need, such as firmware updates."

System Administrator
Corporate Telecommunications Services Verizon Communications, Inc.
(February 2005)

"Reliability was a key selection criteria when we were searching for a load balancer.  We are very satisfied with WebMux, particularly with its ease of setup and host fail over.  We are using WebMux as a firewall as well as load balancer."

CTO/CIO
Voicebank.net
B-to-B services organization in the entertainment industry
(July 2004)

"Microsoft® Office Live Communications Server 2005 Enterprise Edition's tiered architecture benefits customers by substantially improving reliability, availability and scalability.  The WebMux load balancer helps with data center deployment requirements that are critical to our enterprise customers by providing a low cost, high performance load balancing solution."

Senior Product Manager, Real-Time Collaboration
Microsoft®
(November 2004)

"WebMux is a great value product with an extremely good cost of ownership. It is easy to configure and maintain.  In addition, CAI and AVANU are excellent companies that provide very timely delivery and great support."

Systems Administrator
Electronic Clearing House, Inc.
ECHO, Division of Intuit® Merchant Credit Card Processor
(July 2004)

"CAI's WebMux was the ideal, cost-effective solution for our load balancing requirements. Easy installation coupled with features suited for our application did not warrant the expensive high performance equipment offered by other vendors."

President
Propay
(July 2004)

"The WebMux features and cost of ownership were key in our selection of CAI Networks from AVANU as our supplier of load balancers.  We are very pleased with the trouble free performance and will purchase additional units without hesitation as the need arises."

Product Systems Manager
Telematch, Division of Gannett Offset.
(July 2004)

"Reliability and speed is what sold us on WebMux.  We have one unit that has been operating for three years, trouble free!  The value for our investment far exceeds anything offered by other products."

CTO
Qcorps Residents, Inc. (WhiteFence™)
Consumer Home Utility Shopping Services
(July 2004)
