Benefits

Increase ROI

SoftXpand allows you to increase the return on your hardware investment. Turn every new PC you purchase into 6 or more workstations.

Re-Purpose Current PC's

SoftXpand can operate on any existing or new PC. Are you looking to add PCs to your organization but do not have the room in your budget? SoftXpand is a low cost solution that allows you to re-purpose your current PCs and **Xpand** them into multiple workstations.

Reduce Costs

Up front cost savings include 60% on the purchase cost of new workstations. Over time you will reduce maintenance costs by 80% and save 75% on electricity. On top of that, the next time you purchase computers for your school, you will continue to endure your cost savings.

Go Green

Help protect our environment and increase your organizations image. With SoftXpand you can reduce your carbon footprint by 80% and energy consumption by 75%.

High Performance

SoftXpand optimizes the utilization of the GPU & CPU providing **full PC performance** and experience **to ALL users**.

Flexibility

Implementation is **very flexible** using **ANY monitor** (USB, VGA/DVI, HDMI, DisplayPort). SoftXpand works with various configurations and applications.

Software Only

Unlike other solutions, SoftXpand does not require any proprietary hardware and easily integrates **with any 3rd party application**.

Plug & Play

SoftXpand is a **Plug & Play** solution using **USB devices** and it installs in seconds. It is the easiest computer sharing technology to setup and use on the market. Best of all, it works over any media - hardware, wireless, or network.

softxxpand

Turn Any PC into multiple independent workstations.

SoftXpand **software** turns **ANY PC** (desktop/server/laptop) into multiple independent workstations.

It is done **simply** by connecting standard monitor, keyboard and mouse to ANY PC (via VGA/DVI/USB/HDMI).

ALL users experience is the same as with a standard PC. **No degradation** in performance.

All users can run **ANY application**, including heavy graphic and multimedia applications.
