

Release 12.0 Highlights

Release 12.0 Highlights

Release 12 ushers in a new era for Slingshot. We've introduced a compelling, fully integrated solution for multi-channel retailers and we've added more than 50 functional enhancements to the Enterprise Business Suite. We've continued the evolution of our platform and user interface to support the best available technologies and user experience. At Slingshot, we're committed to delivering innovative products, and Release 12 is our best yet. The highlights:

Expanded functionality in Fixed Assets and Point of Sale applications

Release 12 features expanded Fixed Asset Management functionality and a brand new, fully integrated Point-of-Sale application. Fixed Assets introduces comprehensive fixed asset management and asset accounting functionality to the Enterprise Business Suite, allowing you to manage the entire asset lifecycle. Slingshot's Point of Sale (POS) application, launched earlier this summer, is fully integrated with the Enterprise Business Suite, providing an end-to-end retail management solution for multi-channel retail enterprises.

More than 50 Functional Application Enhancements

Release 12 includes more than 50 enhancements to Slingshot's Enterprise Business Suite. Among the improvements:

- Work order processing enhancements, including financial work-in-process tracking and support for material usage variance
- Support for multiple sets Ledger books (multiple accounting treatments)
- Multi-level requisition and purchase order approval functionality
- Support for prepaid expenses and deferred revenue
- Support for recurring vouchers and recurring invoices

Several Infrastructure and Platform Improvements

The continued integration of AJAX technology has unlocked several new opportunities for infrastructure and platform enhancements. Here's what's new and exciting:

- New copy/paste functionality: users can copy from spreadsheets and paste directly into Slingshot applications, or copy from Slingshot and paste to a spreadsheet
- Dynamic sorting capabilities added to Slingshot detail forms
- Enhanced cross-browser support for Internet Explorer, Firefox, Chrome, Safari
- Upgraded reporting facilities and migration to Crystal Reports 2008
- Numerous AJAX usability enhancements
