BUNN[®]

BUNN[®]

PHASE BREW™ FACT SHEET

BUNN[®] IS BRINGING BETTER COFFEE HOME with the introduction of Phase Brew™, a new-age brewer that has redefined the drip coffee industry with technology that produces better coffee, every time you brew.

FEATURE	BENEFIT
Two-Phase Flavor Extraction Process	Better coffee every time. Enables water at the perfect brewing temperature to more effectively extract flavor from the coffee grounds.
Heat & Release Technology (Patent Pending)	The technology that heats and holds water until it all reaches the perfect temperature and is ready to be spray-released over the coffee grounds.
8-Cup Carafe	This batch size eliminates coffee waste and promotes consistent, high quality taste in each cup. Perfect for households with two coffee drinkers.
Cyclonic Heating System™	The method of heating the water to 200°F, the ideal brewing temperature. It heats cold water at a touch of button by circulating it through the brewer.
10-Minute Total Cycle	The 6-minute heating phase and 4-minute brewing phase create smooth coffee with richer flavor and amazing aroma.
Programming Capability	You'll never have to wait for your perfect cup with this feature that allows you to have coffee ready when you'd like to enjoy it.
Time-To-Clean Technology	This convenient feature keeps your brewer functioning at its best by telling you when it's time to clean your brewer, based upon need, not number of cycles. When the brewing system starts to slow down due to lime build-up, it will trigger the Time-to-Clean indicator to remind you to perform regular maintenance.
Thoughtful Design	The brewer was designed to demystify the brewing process. It allows you to see where the "magic" happens - the brew funnel - instead of hiding it away inside the machine.
Superior Styling	The open design allows your kitchen design to show through.
3-Year Limited Warranty	The brewer was built to last and backed by BUNN [®] Customer Service professionals who are armed with the information and ability to help those in and out of warranty.
Auto Warmer Shut-Off	The brewer remembers even when you don't! It comes complete with a warmer plate on the glass carafe model that shuts off automatically after 2 hours.
Commercial Heritage	For over 50 years, BUNN [®] has been managing the science of brewing in all the places you enjoy delicious coffee. From fine restaurants to cafés, donut shops to convenience stores and in your own home, you can count on our experience to deliver you exceptional coffee, every time.
