

U.S. Department of Justice

Federal Bureau of Investigation

Clarksburg, WV 26306

October 1, 2010

Mr. Brian Skiba  
MaxID Corp  
2731 Prosperity Avenue, Suite C  
Fairfax, VA 22031

Dear Mr. Skiba:

The Federal Bureau of Investigation (FBI) Criminal Justice Information Services (CJIS) Division has completed a review of the following test data:

Submitting Vendor	Equipment
MaxID Corp	iDL500 mobile single finger capture device, incorporating the Futronic FS88, at 500 ppi, when used for fingerprint image transmission (PIV-071006 Mobile ID SAP 20)

This review was conducted by representatives of the FBI and the MITRE Corporation's image processing laboratory located in Bedford, Massachusetts. Based on the results of this review, the FBI certifies that the equipment described above is in compliance with the following FBI CJIS Division's Integrated Automated Fingerprint Identification System Image Quality Specifications (IQS):

**EBTS Appendix F Mobile ID SAP 20 using  
Personal Identity Verification (PIV) Single Finger Capture Device Specifications**

Please note, the certification process does not endorse one product over any other product and only demonstrates that the product meets FBI standards. Continued acceptance of the images created by an installed system, for retention in the FBI Master Fingerprint files, is contingent on the ability of the product to meet the IQS over time. As equipment can degrade, the FBI recommends that your company assist customers in the establishment of quality assurance programs and appropriate maintenance schedules for your products.

Please direct any questions regarding this certification to Mr. John M. Manzo at (304) 625-4039 or by email at [john.manzo@leo.gov](mailto:john.manzo@leo.gov).

Sincerely yours,

  
for Jerome M. Pender  
Deputy Assistant Director  
Information Services Branch  
Criminal Justice Information Services Division
