InfiniteGraph to Sponsor and Present at Developer Conference, QCon 2010 San Francisco

InfiniteGraph's lead developer to speak on processing big data

For Immediate Release:

Sunnyvale, CA -- October 28, 2010 –InfiniteGraph, developer of data technologies enabling advanced and large-scale data analytics for enterprise and government applications, will be sponsoring and presenting at QCon 2010 San Francisco, which will take place November 1-5 in San Francisco, California, at the Westin San Francisco Market Street.

QCon is an international developer conference consisting of two days of tutorials led by industry experts and authors, and three conference days with 15 discussions covering a wide variety of relevant and exciting topics in software development today. There is no other event in the U.S. with similar opportunities for learning, networking, and tracking innovation occurring in the enterprise software development community.

In addition to sponsoring QCon, InfiniteGraph is also giving the first session presentation, Wednesday, Nov. 3, from 10:35-11:35am. InfiniteGraph's chief architect, Darren Wood, will be discussing the issues related to storing and managing very large scale graph (complex relationship data) structures in his session titled "Processing Massive Graphs for Relationship Discovery."

InfiniteGraph's distributed database technology and developer application programming interface (API) were created to help organizations obtain real-time answers from deep analysis of complex, multi-dimensional relationships that live within their mission-critical data. InfiniteGraph is designed to exceed the technical and business requirements for a wide range of audiences and end-users, including large enterprise and government entities. Events attendees are encouraged to visit company representatives at booth #5 to learn more about InfiniteGraph.

About QCon

QCon is the enterprise software development conference designed for team leads, architects, and project management and is organized by the community, for the community. As software developers and architects ourselves, we wanted to craft the ultimate conference. QCon runs five times a year in London, San Francisco, Tokyo, Beijing, and Sao Paulo. For more info on QCon, please visit http://qconferences.com

About InfiniteGraph

InfiniteGraph's uniquely distributed graph database solution enables commercial, enterprise, government and other organizations to discover complex relationships in their vast and highly distributed data, with significant time-to-market advantages and technical cost savings. Please visit http://www.infinitegraph.com for more information.

About Objectivity, Inc.

Objectivity, Inc. is the leader in distributed, scalable data management technology. The company's patented distributed data engine and persistent object store is the enabling technology within many markets, powering some of the most complex applications and mission critical systems used in commercial, enterprise, government and research organizations today. Objectivity, Inc. is headquartered in Sunnyvale, California, USA.

Objectivity, Objectivity, Inc., Objectivity/DB and InfiniteGraph are trademarks of Objectivity, Inc. All other company, organization, product or alliance names mentioned herein remain the property of their respective owners.
