Multi-carrier High Volume Shipping & Packing

ExactShip tightly integrates with all of the major ERP, WMS, and CRM applications, and automates the key aspects of the ordering process, including:

- Single, integrated interface to all orders and shipments from inside your business systems.
- Governance of the company's business policies via our user configurable business rules engine.
- Measure billing dispute claims and resolutions.
- Optimize delivery schedules and find best rates from your freight and parcel carriers.
- Quote accurate shipping rates to customers each time including known accessorial charges.
- Tracking the order and shipment, with notification to critical parties of status changes.
- Automated collection and reconciliation order and shipping history.
- eStore order and shipment processing.
