

Korea's Leading Soft Flooring

Manufacturer and Supplier
to the **2004 Olympics**

- ◆ Affordable
- ◆ Scratch-proof
- ◆ Stain-proof
- ◆ Eco-friendly EVA
- ◆ Stress-crack resistance
- ◆ Hot-melt adhesive waterproof properties
- ◆ Resistance to UV radiation

Supplier to 2004 Athens Olympics

Sponge Works, a leading Korean manufacturer and supplier of premium soft flooring, is launching its cutting-edge product line of innovative flooring to the U.S. market. Previously chosen as the flooring supplier to the 2004 Olympics in Athens, the 14th Asian Games, the 22nd Universiade, the 5th World Junior Taekwondo Championship, and other international championships and games events for its affordable, eco-friendly, scratch-proof and stain-proof flooring, Sponge Works is now offering these pioneering flooring solutions to buyers in the U.S.

"Sponge Works' innovative technology prevents mats from scratching and staining, which makes our products unique from our competitors," says Mr. Ko, C.E.O. of Sponge Works. "Plus, EVA is a great alternative to other flooring materials because of its eco-friendly characteristics and sustainability."

According to the University of Michigan's Human Engineering Center, anti-fatigue mats can prevent accumulated fatigue and muscle or blood vessel damage in the lower body by up to 50%. Plus, the flooring is extremely easy to install, care for and clean. Anti-bacterial technology prevents germs from spreading, which is an ideal benefit for high traffic rooms and buildings.

"Hardwood flooring is expensive. Moreover the wood loses its shine over time... sometimes the hardwood flooring becomes slippery and dangerous to walk on in socks," says John Gibb, EzineArticles.com

"Not only do these soft flooring tiles provide cushioning protection for your children, your floors, or your tired feet, but they are ideal anywhere a comfortable floor is needed," says Tony Zovko, Expert Author, EzineArticles.com

The chosen supplier for fitness clubs, gyms, schools and high traffic rooms that require soft impact.
