

Please join us for a private tour of the Patient Tower currently under construction at the Williamsport Regional Medical Center. Officials from the LF Driscoll Construction Management Company, Stantec Consulting and Susquehanna Health will be on-site to guide the tour and provide details about each patient care floor.

Part of what we call Project 2012, this 270,000 square foot expansion project is the largest in our history. You will see improvements underway that include a new Emergency Services Department, new single occupancy rooms and an Education and Innovation Center. Opening in spring of 2012, the interior will feature an improved healing environment for patients with spacious private rooms using evidence-based design features.
