

PRODUCT QUICK REFERENCE GUIDE

TASICA™ WORKFLOW

TASICA WORKFLOW

- Create self-service applications for any business process.
- Integrates seamlessly with IBM Lotus software including IBM Lotus Forms and WebSphere Portal.
- Integrate with existing infrastructure for fully comprehensive workflows.

TASICA WORKFLOW DESIGNER

- Create and modify workflows using a point-and-click, wizard driven design tools.
- Integrated with a highly visual design environment.
- Easy access to eforms and reporting design while creating and modifying workflows.

TASICA™ DYNAMIC REPORTS

TASICA DYNAMIC REPORTS

- Data-centric, real-time reporting tool.
- Aggregates information from Tasica Workflow applications into customized reports.
- Provides audit trails for all workflow activity.

TASICA DYNAMIC REPORTS DESIGNER

- Create customized reports with point-and-click, wizard driven design tools.
- Integrated in a highly visual design environment.
- Group workflow data to based on a variety of workflow variables.

TASICA™ PORTLETPACK

- Compatible with any enterprise portal including IBM WebSphere Portal.
- Manage and monitor workflow through a customized user interface.
- Accomplish workflow tasks and action items along side business information and applications.

TASICA™ INDUSTRYSOLUTIONS

BANKING

TASICA SOLUTION BENEFITS

EASE OF USE

- Users of all skill levels can create eforms, workflow and reporting applications side by side.
- No coding required! Highly visual point and click, wizard driven design environment.
- Realize value faster with rapid application development.
- Manage and complete workflow tasks from web interface or portal environment.

INCREASED PRODUCTIVITY

- Improve operations with efficient applications for any type of business process.
- Save on costs from paper form management, and form processing time.
- Ensure accurate data by avoiding human data entry errors, lost action items and redundant tasks.
- Real-time communication between employees, partners and customers.
- Complete and manage applications along side your critical business data
- Link individual workflow applications together to initiate or interact with multiple business processes.

REAL- TIME COMMUNICATION

- Enhance communication with directory integration.
- Faster response time with real-time notifications via email or Smartphones.
- Access HTML eforms and complete tasks from Smartphones.
- Improve eform management with document repository integration.
- Leverage up to date data by integrating workflows with databases.
- Sustain a competitive edge with faster response to customers.
- Integrate with web services to connect to a variety of Service Oriented Architecture based systems.

INSIGHT TO OPERATIONAL ANALYSIS

- Learn about process efficiencies with out-of-the-box workflow monitoring.
- Integration with dashboards for real-time business insight.
- Create workflow reports in Tasica Dynamic Reports' no code design environment
- Aggregate workflow data clearly with Tasica Dynamic Reports in the web or portal environment.

TASICA WORKFLOW / DYNAMIC REPORTS PLATFORMS

- Windows Server
- Red Hat Enterprise Linux
- Suse Linux Enterprise server
- IBM AIX

TASICA WORKFLOW/DYNAMIC REPORTS BROWSERS

- Internet Explorer
- Firefox
- Safari

ELECTRONIC FORMS INTEGRATION

- IBM Lotus Forms (Xforms, XFDL)
- IBM Lotus Forms Turbo
- HTML Forms

ENTERPRISE PORTAL INTEGRATION

- IBM WebSphere Portal
- Oracle WebLogic Portal
- SAP Portal
- Liferay Portal CE

IBM SOFTWARE INTEGRATION

- IBM Lotus Forms
- IBM WebSphere Portal
- IBM Lotus Quickr

DATABASE INTEGRATION

JDBC relational databases including:

- Microsoft SQL Server
- IBM Db2
- Oracle
- MySQL
- and many more

DIRECTORY INTEGRATION

- Microsoft Active Directory
- IBM Lotus Domino
- IBM Directory Server
- LDAP
