 * During its nearly 50 year history, St. Jude has *
 * pioneered a bench-to-bedside model in advancing the *
 * care and treatment of catastrophically ill children and *
 * developed groundbreaking protocols for providing *
 * outpatient pediatric cancer care. *

Your gift of \$230 to St. Jude Children's Research Hospital has helped so many of our boys and girls spend this Father's Day with their dads -- and I'd like to share one of their stories with you today.

At St. Jude, Evans' parents quickly learned that we were serious about beating his cancer. His mom remembers, "As soon as Evans' doctor walked in the room and told us that Evans had ALL, I said, 'Can you treat him?' and his doctor said, 'No, we're going to cure him.' I can't tell you how it feels, as the parent of a child battling cancer, to hear those words. It is amazing."

Today Evans is one step closer to making his doctor's promise come true -- because his cancer is in remission, and Evans is looking forward to spending this Father's Day with his dad.

For the children.

Charles Thomas

P.S. *U.S. News & World Report* has ranked St. Jude the top children's cancer hospital in the nation. We are honored that the magazine has recognized our focus on world-class research and first-class patient care.
