

ProRehab: The Best First Choice for Low Back Pain

"ProRehab was my first thought when my physician said I needed PT...My daughter was a previous patient at ProRehab and had a great experience.."
ProRehab Patient

Scientific Evidence is CLEAR

90% of Acute Low Back Pain patients see a **50% reduction in pain** within a week

- Current episode <2-3 weeks
- Symptoms don't extend below knee

67% of Chronic Low Back Pain patients experience a **50% decrease in disability** within 8 weeks

- Average straight leg raise test >91°
- Aberrant movement during lumbar flexion
 - Positive prone instability test
 - Age < 40 years

Patients SAVE

ProRehab has reduced the average number of visits per patient to **30%** less than the national average.

- Fewer co-pays by the patient
- Less travel costs to the patient
- Convenient locations = shorter distance

ProRehab's PROOF

Oswestry LBP Disability Scores for ProRehab patients show a **13% change**,
or
MCID = 6

(Minimum Clinically Important Difference)

= MEANINGFUL IMPROVEMENT
