

Tap 4 Tots – Children's iPhone app makes learning fun

Tap 4 Tots - Children's iPhone app makes learning fun

This simple gem of an application targets the tender learning ages of 6 months up to 8 years, and teaches young children the words for our facial features in 7 different languages. Touch the mouth of the cute monkey for instance, and hear the word for "mouth".

Beverly Hills, CA ([PRWEB](#)) November 23, 2010 – Today, Tap 4 Tots is celebrating its 5000th download.

To celebrate, the makers of this iPhone app specifically designed for kids have put it on special for one week.

“What really impressed me is that within an hour, my son knew 5 words in Chinese”

Sam, who is both a father and the man behind the idea of Tap 4 Tots, said that:

“My children inspired me to come up with an app that was both fun and entertaining, but most importantly something they would learn from.”

“I knew I had a great idea when we created a test version of the app, and my 6 year old son took to it like a duck to water.”

“What really impressed me is that within an hour, my son knew 5 words in Chinese.”

This simple gem of an application targets the tender learning ages of 6 months up to 8 years, and teaches young children the words for our facial features. Touch the mouth of the cute monkey for instance, and hear the word for “mouth”.

Sam continues: “This is exactly what Tap 4 Tots is, nourishment for a growing brain, but in a fun game. Not only do your children learn quickly, but they learn in 7 different languages too!”

“Tap 4 Tots will help your children learn words in English, Greek, Cantonese, Mandarin, Italian, Arabic and Bahasa”, Chris says.

Chris, who helped develop Tap 4 Tots with Sam said: “Have you ever wondered why some parents teach their children to play chess or play a musical instrument from a very young age? Because their brains are like sponges at this age, and the more they learn today, the more they know tomorrow.”

Sam explains that: “It’s very satisfying to be in an industry that gives parents like me the opportunity to develop such child-friendly apps, and make them available to parents around the world using a platform like the iPhone and the iPad.”

Tap 4 Tots was ranked No 1 by Apple as New and Noteworthy app under the iPhone Education category
