

## **Mobilespin Launches New Mobile App for iPhone and Android**

*Mobilespin Launches ["Greeting Card Effects"](#) Application on the Apple App Store and Android Market*

San Jose, CA ([PRWEB](#)) November 20, 2010 -- Mobilespin Inc, a mobile social networking site, unveils its new mobile application (app): [Greeting Card Effects](#)

"more and more, apps are becoming a part of our mobile experience, so in addition to [Mobilespin's](#) mobile social networking platform and its free tools and services, we wanted to provide users with an even broader choices for enhancing their mobile experience." says Fred Khosropour, CEO of Mobilespin.

[Greeting Card Effects](#) Greeting Card Effects allows users to make custom Greeting Cards, Invitations and Note Cards with that personal touch from their own photos.

The app is perfect for Christmas, holidays, birthdays, invitations or a personalized note for that special someone.

For added fun, the app offers effects such as continuous mode, like falling snow and snowflakes, on a chosen image.

With the purchase of [Greeting Card Effects](#), users can make unlimited:

- Customized Greeting Cards
- Personalized Note Cards
- Invitations
- Fun photos

The app is very easy and user friendly to use.

Free lite versions of the app is also available for users to try out. Mobilespin will continue to expand its app portfolio.
