

Globally Connected : Delivering Technical Services Worldwide

Eljay Engineering

Managing Communications Over IP

www.eljayindia.com

Data Center Services

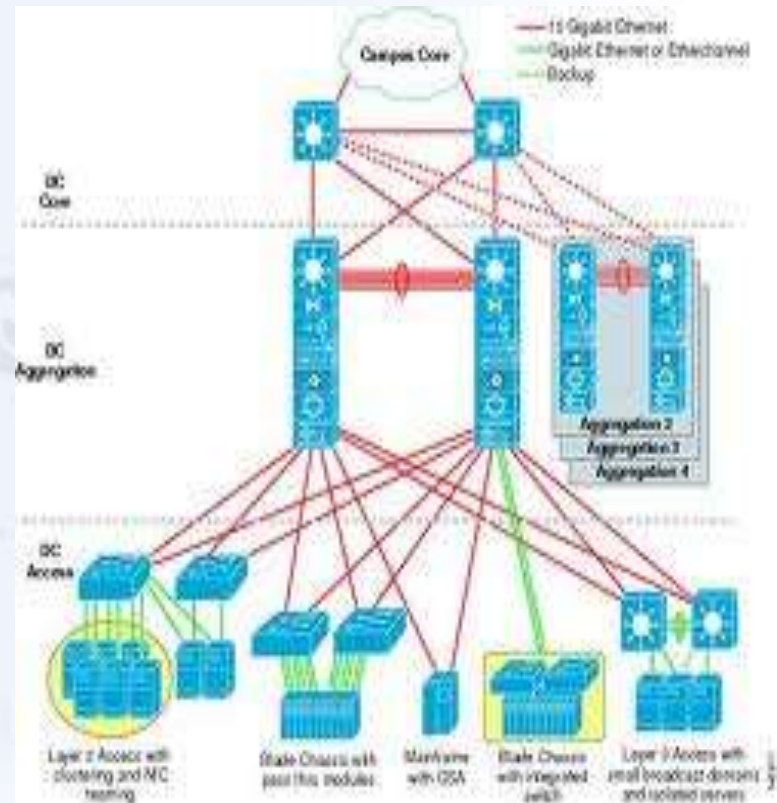

- Data Center Consulting
 - Design
 - Implementation
- Data Center Support
 - Multivendor Systems Maintenance
 - Remote Availability Monitoring

Datacenter consulting - Design

- **Design**

- Design based on maximum utilization of existing Infrastructure
- Design Solutions are regular hosting of servers (either as virtual or physical machines), disaster recovery using SAN replication of production client site to hosting DR site and remote backups
- Our competency is effective usage of virtualization technologies in hosting solutions
- Involvement of experienced and certified engineers

Data Center Consulting-Implementation

- **Implementation**

- We help implement existing designs by providing well-trained and certified implementation engineers.
- Our SE(system engineers) are trained to perform the installation and configuration work required at datacenter environments.
- This can range from relatively simple P2V conversions (eg. using VMware converter) to SAN replication configuration (eg. NetApp snapmirror)

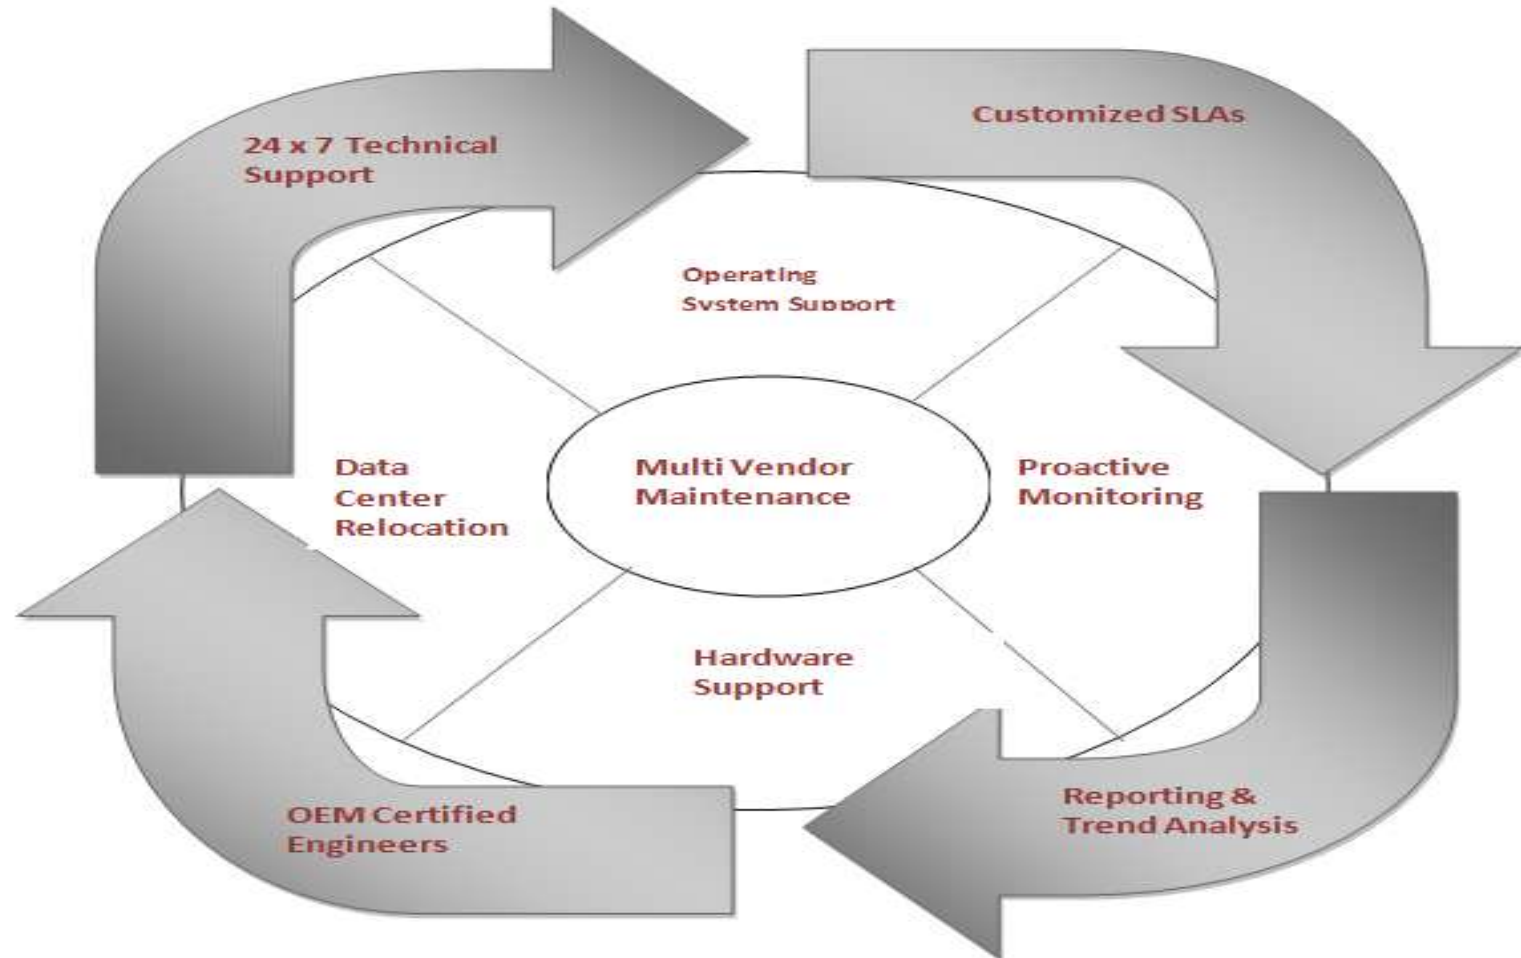

Data Center Support

- Support and Remote Monitoring services
- It is often difficult for hosting firms to support a heterogeneous set of technologies that exists in today's datacenters
- Often designed solutions involve a mix and match of different software and hardware vendors
- Sometimes this leads to situations where well-designed solutions can still cause end-customer dissatisfaction due to lack of proper support
- Our helpdesk assists in problem resolution and escalation management by proactively monitoring alerts and performance levels
- Helpdesk can immediately involve the correct set of our support engineers to resolve issues in response to alerts or performance thresholds being exceeded

Data Center Support Overview

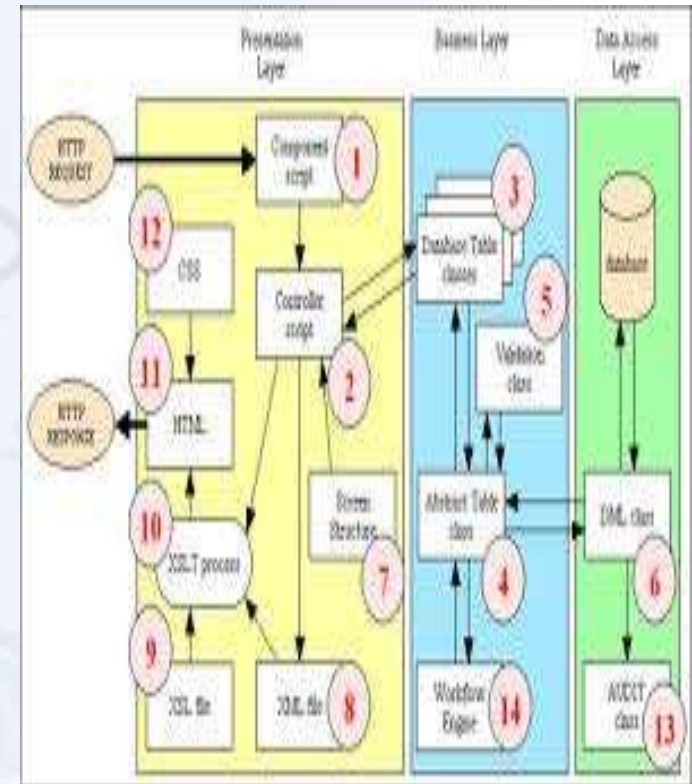

Data Center Consulting

**Increase Efficiency, Reduce Costs, Manage Risk
in the Data Center**

Infrastructure Assessment Services

- Infrastructure Assessment Services

- Identifying Gaps
- Risks & Opportunities for improvement
- Utilization
- Capacity Planning
- Consolidation
- Security
- Compliance
- Overall effectiveness

Microsoft Infrastructure Consulting

- Performance Optimization
- Reliability & Scalability Planning
- Platform Upgrades
- Migrations
- Optimum usage recommendation of Hyper V

Microsoft
GOLD CERTIFIED
Partner

HYPER
Virtualized

Windows Server® 2008
Hyper-V™

Windows Server®
Active Directory

Microsoft
SQL Server

Virtualization Services

- Server, Desktop & Application Virtualization
- Technology adoption recommendations
- Migrations & On going support

Multivendor Maintenance Services

- Operating systems

- Windows
- Linux
- Unix

- Storage

- Sun Microsystems
- HP
- Dell
- IBM
- Hitachi
- Quantum
- NetApp
- EMC

Remote Monitoring Services

- Performance Monitoring - *Averting Potential Issues*
- Real-Time Hardware Fault Monitoring - *Expediting the Problem Resolution Process*
- Reporting & Trend Analysis - *Optimizing Utilization & Performance*
