enGrant.com – FAQ

Frequently Asked Questions

What is enGrant ?

enGrant is the world's most comprehensive source of information on scientific research grants, research activity and funding trends. This information is available through the enGrant Search Engine…an intuitive online tool that allow you to search a database of over two million scientific research grants and the work of 300,000 unique researchers.

What information is available through the enGrant Search Engine ?

- 2 Million Scientific Research Grants
- 122 Unique Funding Sources
- 300,000 Primary Investigators & Researchers
- 30,000 Universities, Companies and Government Agencies
- 1.3 Million Peer Reviewed Publications
- 12,000 Patents resulting from the funded research projects
- $200B in total Grant Funding

What grant information is included in the enGrant database ?

enGrant continuously gathers data from over 120 funding sources including such major agencies as:

- NIH - National Institutes of Health
- NSF - National Science Foundation
- CDC - Centers for Disease Control
- FDA - US Food and Drug Administration
- VA - Department of Veterans Affairs
- and dozens of additional public and private funding sources

enGrant is continuing to add additional sources on an ongoing basis…

How often is the enGrant database updated ?

Information from primary sources such as NIH, NSF, CDC and FDA is aggregated and updated to the database on a bi-weekly basis.

What are the advantages of enGrant vs. NIH RePORTER ?

The enGrant database is significantly larger than NIH RePORTER. It contains the full contents of NIH RePORTER as well as significant grant and research information from a wide array of additional public and private sources.

The enGrant Search Engine is a more intuitive and functional tool to search, review and analyze research activity. With NIH RePORTER, information pertaining to a single grant is scattered across multiple screens.

With the enGrant Search Engine, you also have options for exporting and sharing of search results with colleagues that cannot be matched by anything available through NIH RePORTER.

What other features does enGrant offer ?

- **The enGrant Search Engine -**
  - Hybrid Search Engine combining Search & Filtering
  - Save & Name Your Searches for Future Use
