## The Guidance You Need

Many people may look at Medicare coverage as a choice just between Medicare plans. But, there's more to consider. Finding the right Medicare coverage for your individual needs also means understanding which direction to take with Medicare in general. For example, do you need to combine traditional Medicare coverage (Parts A and B) with Medicare Part D and possibly Medigap, or would you prefer to use a Medicare Advantage plan that includes Medicare Part D?

*Allsup Medicare Advisor* experts can answer your Medicare questions and address your concerns, such as:

- Do you want a portable plan that goes where you go?
- Does your physician participate in the plan you want?
- Which plans cover your prescription drugs?
- Will you fall into the prescription drug "donut hole" or coverage gap?
