

AirStash®

THE ESSENTIAL IPAD ACCESSORY

Part Wireless Flash Drive. Part Media Streamer. All Versatile.

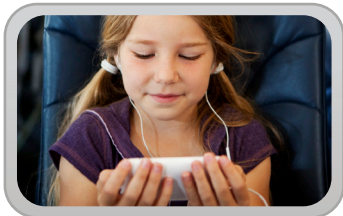

Selected by *Popular Science* magazine as one of its 25 Hot Products in 2010, AirStash is a pocketable wireless flash drive and media server that fulfills the iPad promise to “leave your laptop at home” by providing users with a fast and efficient way of sharing files between devices without iTunes or email.

AirStash is as versatile and simple to use as it is functional. Use it to save and share documents, stream media files, and view or import photos. And with AirStash’s long-lasting, rechargeable battery, you’ll enjoy up to 5 hours of uninterrupted access wherever you go. In other words, AirStash is the iPad accessory you’ve been waiting for!

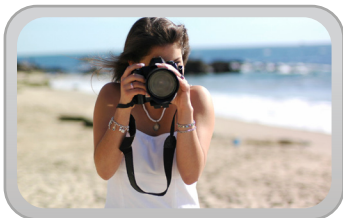

The World’s Only USB Flash Drive for iPad & iPhone

Stop emailing files to someone in the same room! AirStash lets you carry your files with you and share them between devices quickly and easily. Save and access files wirelessly, or plug AirStash into a computer’s USB port to drag-and-drop your files. It works with new and existing apps including Apple’s Pages, Keynote, and Numbers for iPad.

Premium Media Streaming

Store and stream HD video and audio from your pocket. AirStash is a premium social multimedia server that gives you the freedom to enjoy movies, TV shows, and music wherever you are. It even allows you to share and play different media files on multiple devices simultaneously.*

Easy Photo Importing

Viewing, sharing, and importing photos are simple with AirStash. Plug your camera’s SD card directly into AirStash’s SD card slot to quickly and easily transfer photos back and forth from your iPad, iPhone, or iPod touch. Plus, enjoy unlimited storage with up to 32 GB per SD card.

Additional Features

- Optimized for Apple products but works with most WiFi-enabled devices including: Android, Blackberry, and Windows phones; netbooks, tablets, laptops, desktop computers, and more
- Firmware upgradeable
- Online services/Cloud connectivity
- Pocket-sized design does not interfere with existing device cases

Wearable Inc.
