

WHAT WE ARE

"An easy-to-use, web-based solution for transportation partners to create an efficient market to minimize costs, improve communication, and maximize control."

Quoting
Booking
Tracking
Reporting

GR8FR8.com provides both shippers and carriers with powerful but simple tools to move goods across North America.

In a perfect world, carriers always fill their lanes; freight arrives at its destination on time, on budget, and always with unanimous satisfaction of a logistic job well done. GR8FR8.com is the logistics community where that dream meets reality.

- FR8Mart™ Rate Submission

Your Logistics Community

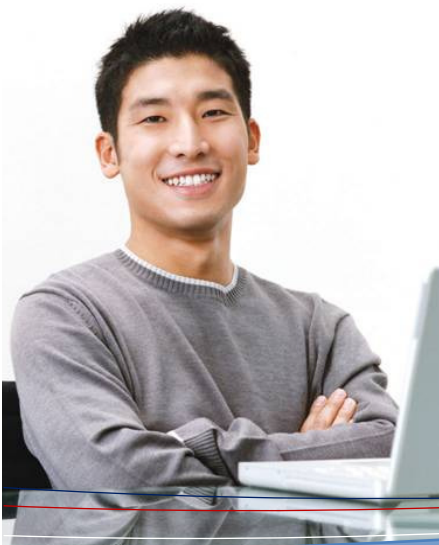

CONNECTING CARRIERS AND SHIPPERS.

The only way for a shipper to *truly* know what fees are being paid, is to pay the carrier directly; and get fresh, honest quotes from real people.

WHY WE'RE DIFFERENT

- NO CONTRACTS
- TMS TOOLS & MARKETPLACE
- DIRECT TENDERING
- FLAT-RATE PROCESSING FEES
- PAY-AS-YOU GO OPTION

revolutionary solutions for your business needs

TRANSPORTATION MANAGEMENT

Tracking is critical in today's fast-paced world where profit margins are smaller and customers are more demanding of updates. One of the fundamental features that a Transportation Management System (TMS) provides is the means to centrally monitor and track the progress of shipments. At GR8FR8, we provide the tools to track your shipments from tendering to pick-up; from delivery to settlement; and every desired update in-between without ever having to pick up the phone.

LOWER FREIGHT COSTS

Whether you calculate soft savings or hard savings, GR8FR8 could lower your freight costs substantially. With our FR8Mart™ bidding application, shippers can post freight for carriers to offer quotes on in a free-market bidding platform. This means you will get fresh quotes based on the current needs of carriers, not pre-loaded negotiated rates, and *without* brokerage fees baked in.

POWERFUL TOOLS

No need for expensive services that bundle packages with features your company may never use. Our powerful, yet simple tools are made for small to mid-sized shippers who would like to affordably streamline their shipping process.

CLOUD-BASED SOLUTIONS

An in-house, server-based TMS can cost over 6-figures and will exhaust internal resources to implement initial and subsequent functionality. GR8FR8 is simple to use, delivered over the web, and free of implementation time and large fees.

SIMPLIFY WITH A CLICK

Make your job easier by utilizing GR8FR8 to process, queue, and store your shipment data. Beta tests have shown mid-sized shippers have cut time by 50% by using our services. What could YOU do with that extra time?

STILL USING A BROKER, INSTANT QUOTE WEBSITES, SPREADSHEETS, OR FAX MACHINES?

[Welcome to the future of freight management.]
