

FOR IMMEDIATE RELEASE

New US Local Directory Announced By Ezilon.com

Houston, Texas - January 27, 2011 – Charles Michaels of Ezilon Inc. renews the company's commitment to providing only the best local directory and regional directory listings. Through the release of its new site at <http://local.ezilon.com>, Ezilon Inc. will be able to offer local city directories that have been hand checked and verified by people rather than relying on auto listing means. Consumers and businesses will be able to find the services or goods that they are seeking with ease through the local search option.

With this newest website, Ezilon.com offers consumers the ability further narrow their search through the web directory from the regional directories down to local directories at the city search level. Now, not only each region can be searched through its own site, the new website will allow users to browse through individual local listings as well.

Ezilon.com new local directory covers all the major cities in the U.S like New York, Los Angeles, Chicago, Houston, Philadelphia, Atlanta, Dallas Forth Worth, Miami, Denver, Boston, Detroit to mention a few. Businesses can choose to list in the old nationwide directory which is <http://search.ezilon.com>, the new local directory, or both depending on their size. Another thing to keep in mind that, as before, submission to the new company's directory is free unless the submitter decides to opt in for the enhanced article submission which can offer a greater deal more exposure to the consumer.

About Ezilon

Ezilon Inc. has been providing regional directories through the web since 2002. The company's U.S. directory is a major asset to businesses that wish to get their name out to otherwise unreachable consumers. According to Charles Michaels, the inception of the company's newest site strengthens its ability to offer local listing capabilities as well as bringing U.S. local listings to the public. Ezilon Inc. plans on continued increases in the awareness of local goods and services in the future as well. By targeting listings at the local level, more local businesses will be able to

enjoy the same benefits currently available to those that have listed through one of the company's regional directories.

One point of pride for the company is that it welcomes all parties looking to list their sites. Simply submitting site info for verification can quickly lead to its inclusion as a directory submission. One thing to keep in mind, however, is that only submissions that are of high quality and verifiable will be passed through the company's directory submission process.

Companies, small businesses, or individuals interested in submitting their information to the Ezilon regional or local directories may do so by contacting Ezilon Inc either by phone or through the company website at <http://www.ezilon.com>.
