Equipment Rental Module: Developed by Lowery Systems - provides a product created from the ground up to satisfy the varying needs of those distribution companies who also derive revenues through equipment rental.

ERP FACTS with LSi's Equipment Rental Module fully meets the complex requirements of today's rental company, yet maintains the ease-of-use for which ERP FACTS software products have long been famous.

The goal of any Equipment Rental operation is to generate meaningful profit from every item available for rental. Successfully managing this goal requires direct access to real-time data and information analysis with summaries of pertinent business activities.
