

Climb to the next peak in your career with EIM's Certification Programs!

The Objective: EIM Certification Programs provide post-professional training for physical therapists and are designed to advance the physical therapist as a provider of patient care in a specific area. You will be learning from world class faculty from a variety of the best academic programs and clinical practices in the country. EIM offers Certification Programs in the following areas:

- Upper Quarter Musculoskeletal Disorders– 9 credit hours
- Lower Quarter Musculoskeletal Disorders– 9 credit hours
- Extremity Disorders– 9 credit hours
- Spinal Disorders– 10 credit hours
- Manual Therapy– 19 credit hours

The Experience: 90% of the Certification Programs happen wherever you happen to be. Certification Programs consist of intensive didactic, collaborative and clinical education experiences using a combination of distance learning, on-line courses, and weekend intensive hands-on courses. The weekend intensive on-site courses occur at EIM Network Partners and academic centers in key geographic areas around the country, providing easy access via automobile and air travel with suitable hotel accommodations in the immediate vicinity.

The Outcome: EIM's Certification Programs are designed so that you will:

- Improve knowledge of current evidence in preparation for Orthopaedic Board Certification.
- Become a certified, highly skilled, autonomous practitioner with advanced clinical competency in the area of focus of the Certification Program you choose.
- Make evidence-based practice an immediate reality in your clinical practice.
- Enhance your critical thinking and psychomotor skills to improve decision-making and outcomes of care.
- Have the opportunity to use a portion of your Certification Program credit hours toward an EIM Residency, Fellowship, or tDPT program, should you decide to do so down the road.
