CBOSS AND TY COBB HEALTHCARE FORGE TWO-FOLD PARTNERSHIP ONLINE

For Release – February 24, 2010

Boardman, OH –CBOSS, Inc., the leading provider of PCI DSS-compliant, secure online payment solutions for healthcare as well as government and regulated industries, and Georgia-based Ty Cobb Healthcare System, have announced that they have completed the second integration phase of their partnership. In the first phase of the partnership, Ty Cobb implemented the cost-effective ArchITech Content Management System for critical portions of their online presence. The second phase has provided Ty Cobb customers and partners access to the CBOSS Central Payment Portal (CPP) PCI-DSS-compliant online payment solution.

The CBOSS CPP recently implemented within Ty Cobb Healthcare's facilities in rural Georgia is a secure, web-based, hosted service that allows businesses to automate formerly manual payment processing operations, creating a significant improvement in operational efficiency. CBOSS' CPP offers a unified interface for payment integration from multiple sources and provides Ty Cobb the ability to run and process reports from one location. CBOSS' Level 1 PCI-DSS compliance ensured that the CPP was able to deliver the reliability and security that Ty Cobb required in their payments solution.   The Central Payment Portal will offer patients easy access for making credit card or e-check payments online as well as over the phone, and the CPP will centralize all financial data to allow the financial services and administration departments to review data across the Ty Cobb network in real time.

Ty Cobb HealthCare chose the CBOSS ArchITech CMS online portal management tool to allow for their internal staff to take a more hands-on approach to managing and refreshing the Ty Cobb website content. Using ArchITech CMS, Ty Cobb is able to make website changes in-house allowing

1

their community timely access to important information regarding health news such as major recalls and emergency responses at both local and national levels. The ArchITech platform is based on industry standard tools and is able to be expanded in flexibility and features through additional modules as needs and requirements expand.

Within the next week, Ty Cobb will be completing their system modernization, adding a new online store and shopping capability to their Ty Cobb Museum website, integrating both the ArchITech portal management platform and CBOSS' Central Payment Portal for secure online payments.

About Ty Cobb Healthcare

Ty Cobb Healthcare operates a growing network of rural-based hospitals, long term care facilities, a fitness and wellness center, an occupational health and wellness service for employers, and also has administrative responsibility for the internationally-known Ty Cobb Museum. The firm generates nearly $100 million dollars to the local economy on an annual basis according to the Georgia Hospital Association, and is committed to driving the local economies in the communities it serves.

About CBOSS

From enterprise software solutions to managed services, CBOSS specializes in the design and implementation of portal solutions for e-payment processing, workflow automation and content management using industry-standard platforms and tools. Since 1994, over 700 businesses and government agencies have looked to CBOSS to deliver feature-rich services and solutions that are cost-effective, reliable and secure. CBOSS has achieved Level 1 compliance with the Payment Card Industry (PCI) Data Security Standard, which provides the highest levels of security for e-commerce and other e-payment processing services.
