Client Testimonials

“As our network has become the core of all our communications as well as hosting high-visibility applications for our clients, we needed to view our network operations from an enterprise perspective. Our network technology refresh project with Netarx has created a highly-available infrastructure that is extensible for all future needs as well as immediate ones. Managing technology lifecycles, administration and cost-of-ownership was a primary concern in our strategy. We chose Netarx to implement, help administrate, support and guide us forward as they have proven to us their commitment to the technologies and to their customers.”

Tim Lamb, IT Manager, J.R. Thompson

“Netarx’ contribution to Incoe has since moved well beyond being a simple vendor to become a true technology partner involved in many facets of our IT structure. I believe that Netarx will make a valuable addition to any organization that they may partner with. Their technical ability and professionalism far exceeded my expectations and I would make the same choice again.”

Charles Stitman, IT Manager, Incoe

“Making a decision on a new phone system was by no means an easy one. There are so many manufacturers to choose from, and then when you decide on a brand, you’re faced with the decision of which partner to use. Not to mention we were under great time constraints to decide on a phone system and get it installed. Fortunately TNT EDM works with IOS Consulting, Inc. and they recommended that we utilize Netarx because of their unmatched engineering team and their reputation as a Cisco VOIP integrator.

I visited the Netarx facility for a live demonstration to see if the Cisco phone system would perform as we liked before we made the final decision. We were not only impressed with their state-of-the-art facility displaying video conference calling, Meeting Place and all facets of the Cisco solution, but also with their ability to answer all of our questions in a timely fashion in terms we could understand.

The decision became clear that Netarx was the Cisco Unified Communications solution provider that TNT EDM wanted to work with. Netarx then helped us find a financing option that suited TNT-EDM and we mapped out an aggressive time line for installation. Netarx exceeded our expectations for installation, training and follow up. Netarx is unrivaled in their technical resources, staff, and professionalism.”

Chris Skinner, IT Director, TNT EDM
