

There Is a New Message from God in the World

What is the New Message from God?

“A New Message has been sent from the Creator of all life. It is a message to prepare the individual and to prepare the peoples of the world to survive and to advance through the great perils that await humanity. It is a great gift in the face of an urgent need.”

There is a New Message from God in the world. It is a gift from the Creator of all life for the protection and advancement of humanity. It contains a warning, a blessing and a preparation for all the peoples of the world.

The New Message is not based upon any existing religious tradition or spiritual teaching. It is a gift for people of all nations and faiths. It honors the enduring truth in all the great Messages that the Creator has ever given to the world, yet it is unlike anything that has ever been revealed to humanity before.

The New Message from God is a genuine communication from the Creator that has been sent into the world at a time of great change, conflict and upheaval. The New Message provides the knowledge, wisdom and direction that humanity could not provide for itself to meet the great challenges that are now facing the entire human family.

The New Message is an answer to the sincere prayers of peo-

ple from all nations and faith traditions for freedom, security and deliverance. It is a new revelation about humanity's One Spirituality, the preservation of the world and humanity's future and destiny within a Greater Community of intelligent life in the universe.

The New Message from God is contained within a series of sacred texts and teachings. It was revealed over a twenty-five-year period. This revelation continues to this day.

Why is it here?

*“You are driving headlong
into a future that will be unlike the past,
but you are not prepared.*

That is why there is a New Message from God.”

Humanity stands at the precipice of great change and an uncertain future...

With a growing population in a world of limited resources, the threat of widespread human deprivation, escalating conflict and war is greater now than ever before.

That is why there is a New Message from God.

Humanity is facing the growing destructive effects of global warming, catastrophic climate change and environmental deterioration.

That is why there is a New Message from God.

Many of the world's religions are too splintered, too past-oriented and too engaged in competition with one another to alert and to prepare the human family for what is coming. That is why there is a New Message from God.

People are divided and unaware of humanity's One Spirituality and the One Source of all humanity's religious traditions. That is why there is New Message from God.

People are using God and religion to justify terrible acts of cruelty and revenge against others. This is further fracturing the human family at a time when human unity and cooperation are imperative. That is why there is a New Message from God.

Humanity stands at the threshold of space and Contact with intelligent races from beyond the world. This is our destiny. This is the greatest event in human history. Yet humanity is not prepared. That is why there is New Message from God.

Even at this time, there is an Intervention taking place by those forces from beyond the world who seek to take advantage of a weak and divided human family. Yet humanity is unaware and unprepared. That is why there is New Message from God.

These great waves of change that are coming to the world are putting at risk humanity's survival and ability to live as a free race in the future. That is why there is New Message from God.

People are unaware of the reality and power of Knowledge within them, the great endowment from the Creator that has been given to guide and protect each person. That is why there is a New Message from God.

There is a deep yearning within people everywhere for a new relationship with the Divine.

That is why there is New Message from God.

Many people are beginning to awaken to the great need of their soul: the need for purpose, meaning and direction in their lives and the need to make a contribution to the world. That is why there is New Message from God.

The New Message from God has been sent to alert, to bless and to prepare the entire human family. The New Message is vast and far-reaching. It speaks to nearly every aspect of our lives. For over 25 years, its messenger has been receiving this gift for humanity. And the revelation continues to this day...

How the New Message came to be

*“A great love has brought
this New Message into the world—
the love of the Creator for Creation,
the love of the Creator for the human family—
showing humanity its great opportunity within this world to
become a united and free race.”*

The New Message represents the will of God for humanity, both now and for the times to come. God’s will has been translated into language, into a preparation and into a complete teaching through the Angelic Presence who represent the Divine will and purpose for humanity in this world.

The New Message from God was delivered over a period of more than 25 years. It was received in a state of revelation by Marshall Vian Summers. Every word of the message was first spoken, recorded and later transcribed. This has preserved the integrity and purity of the New Message in its original form.

What would eventually become entire books were received in days or even hours. For example, the seven chapters of the introduction, *There Is a New Message from God in the World*, were received in a four-hour period, while the 27 chapters of *Greater Community Spirituality: A New Revelation* were received in just four days. This process of revelation continues.

This is how the New Message from God has come into the world, and its transmission is in keeping with all the great Messages that have ever been sent into the world for the advancement of humanity. God always communicates these great and timely Messages through the Angelic Presence, both to this world and to all worlds within the Universe. This is the nature of Divine transmission. This is how God communicates to individuals and to whole worlds and races.

The New Message from God is meant to serve humanity at this time and in the times to come. It is a very great Message. Its gift, its efficacy and its timeliness for the human family should never be underestimated.

Great Wisdom and Knowledge it carries, Knowledge and Wisdom beyond anything that has been given to humanity before. And it will take great courage, humility and patience to receive the full extent of what the New Message contains. Its power, its truth and the peace that it offers will surpass human understanding.

God's New Message holds the hope and the promise of guiding the human family into the future so that humanity may build greater freedom and justice in the world and take its place as a free and united race in the Greater Community.

How does God communicate to you?

*"Through Knowledge you can feel
the presence of all relationships.
This is the experience of God.*

God is the Source of Knowledge within you, Knowledge being your deeper spiritual mind that the Creator has bestowed upon you and upon all sentient beings in the Universe.

God has created the physical Universe, but not in the way that you might think. God has set in motion an evolutionary process in the physical Universe to occupy all space and time for those who live in space and time, for those who are separated from the Creator by their own will and intentions.”

To understand this statement, that God is the Creator of Knowledge within you, you must understand the difference between your spiritual mind and your worldly mind. You must understand the difference between your Spirit, your mind and your body.

Knowledge within you represents your connection to God and to your life beyond this world. This connection exists both within and beyond all true religions. Knowledge is pure and permanent and is beyond the reach of any worldly power or influence.

The New Message will teach you how to understand these things in the clearest way possible. Yet because this is a new threshold and a new understanding for humanity, it will take time and encouragement from others who are learning with you. It is difficult and challenging to learn something for the first time when everyone around you holds a different set of values and assumptions. If you can see that Knowledge within you is

the part of you that is permanent, the part of you that has been created by God and is still connected to God, the part of you that has been imbued with the wisdom of God to guide and to protect your life in this world at this time, then you can begin to see the nature of this Divine authorship and why it is so crucially important for you who seek to find true purpose, meaning and direction in your life.

What does the New Message Advocate?

1. *Freedom*—Learning to build, maintain and protect one’s individual freedom and humanity’s collective freedom in the face of grave and unprecedented challenges
2. *Human unity, cooperation and the cessation of war and conflict* —not out of high morals and ideals but for humanity’s collective survival
3. *Sustainability and the restoration of the environment*—preserving and sharing the world’s diminishing resources instead of competing over them, to avoid war so that humanity can have a future
4. *Primacy of Knowledge within the individual*—Knowledge is the Great Endowment of the Creator that lives within you and allows you to experience & express humanity’s One Spirituality, beyond all divisions of race, culture, nation & religion. Knowledge alone has the power both to guide and protect the individual and to unite and enable humanity to chart a new way forward
5. *Peaceful coexistence and cooperation amongst the world’s religions*—All the world’s religions were initiated by God and

were never intended to be in competition and conflict with one another.

6. *Becoming strong in the mental environment*—You live in a mental environment as well as a physical environment. The mental environment is the pervasive environment of thought and influence in which we all live. To be able to think freely, to be discerning and to resist mental manipulation, you must learn about the mental environment and become a force within it. Steps to Knowledge, the New Message Book of Practice, teaches you how to do this.

7. *Preparing for the Greater Community* — Our isolation is over. The New Message prophecy reveals that humanity is not alone in the Universe or even within its own world. The New Message is here to prepare individuals and nations for the reality, danger and opportunity of encountering a Greater Community of intelligent life in the Universe. As the native peoples of this one world, we must face our first encounters with intervening forces with wisdom and discernment and establish our own rules of engagement.

8. *Preparing for the Great Waves of Change* —The New Message prophecy reveals that Great Waves of Change are now converging upon the entire human family, creating a situation unprecedented in human history. Among the Great Waves are climate change and catastrophic weather, diminishing energy resources, severe environmental deterioration, declining food production, economic instability and the growing threat of competition, conflict and war over the world's remaining resources. The Great Waves will create immense instability around the world, even in wealthy nations. Recognizing and preparing for the reality of the Greater Community and the coming Great Waves of Change represent the great needs of our time. The New Message has come to prepare us for navigating the difficult times ahead.

9. *Contributing to a world in need*—True happiness is the result of doing what you came here to do. To accomplish this, you must unite your thinking mind with the deeper mind of Knowl-

edge within you and develop the wisdom and strength to fulfill your mission in the world.

10. *Building the Four Pillars of your life*—your life has four pillars, like the four legs of a table, which uphold your life and give it strength, stability and balance:

The Pillar of Relationships
The Pillar of Health
The Pillar of Work & Providership
The Pillar of Spiritual Development

The New Message reveals what the Four Pillars really mean and how they can be strengthened and maintained. You will need strong pillars to be able to withstand the Great Waves and be a source of strength for others.

11. *Relationships of Higher Purpose*— You were born with a mission and with the Knowledge to help you find and fulfill this mission. As a result, there are certain individuals in life you must meet and engage with. At a deeper level, this represents your search for relationship. In the New Message, these are called relationships of higher purpose. The New Message teaches you how to find and discern these individuals beyond all other forms of attraction and obligation. You cannot find and fulfill your mission alone. You will need exceptional relationships of honesty and integrity whose mission and destiny are in alignment with your own.

There must be a new testament advocating these things. The New Message from God is a new testament, a new understanding, a new way, which goes beyond all of the beliefs and assumptions about the past, beyond all of the conflicts and discord from the past.

The New Message advocates wisdom, freedom, purpose, unity and cooperation based upon humanity's One Spirituality and the great needs of our time.

What does the New Message ask of me?

The New Message asks of you honesty, sincerity, integrity and commitment—all the things that everyone needs to establish in his or her own life and everything that needs to be established within the communities and villages, the cities and nations of the world.

The New Message asks you to honor what you need and what the world needs. It asks you to recognize and receive the blessings of the Creator and the preparation that the Creator has sent into the world for the benefit of all of humanity.

If this seems too much for anyone, then they do not recognize their own needs. They have not come to understand the needs of their soul, the needs of their heart. They are preoccupied with what they want and what they fear. They have not yet reached the point of recognizing that they need to find their greater purpose in life. They need to make a contribution in order to feel satisfaction and happiness. They need to give to the preservation of the world in order that their life may feel vital, meaningful and purposeful.

The New Message from God asks that you recognize the need for a New Message, that you read the New Message, that you consider it and begin to apply it and live it.

It asks you to receive its blessings, its benefit, its strength and its power in your own life.

It asks you to share this New Message with others and maintain it in a pure form, without altering it or changing it or trying to align it with anything else.

In essence, you are asked to receive the New Message from God and to bear witness to it. And if you can receive its bless-

ings, you are asked to advocate for it and to advocate for its protection in the world.

So the New Message asks you to receive what you need and what the world needs. Let this be your understanding.

Is this a new religion? Why does the world need a new religion?

The world needs a new understanding and a new awareness. Out of this, forms of spiritual practice and communities will arise and in this sense, yes, it is like a new religion. But the purpose of the New Message is not simply to create another religion in competition or in contrast to all other religions, but instead to advance human understanding of its spiritual reality, its greater challenges in the world and its destiny in a Universe replete with intelligent life.

What humanity needs is a new experience and a new understanding of God's will, intent and presence in the world, of the great change that is coming and of the forces that threaten to undermine human unity, freedom and sovereignty in the world.

The world therefore does not need a new religion as much as it needs a new understanding and awareness and a new commitment to human unity in the face of great undermining change. This is not simply a good idea. This is not simply a high moral principle. This is a necessity if humanity is to survive and remain free.

Only something of great necessity would call a New Message from God into the world. Only a need so prevailing would call such a new testament into the world. Only a situation for which humanity cannot prepare itself would call for a New Message from God and with it, a preparation to enable people to gain

this new experience and understanding, which are so needed in the world today.

*Do I have to become a convert or a follower of
the New Message in order to receive the New
Message?*

No. To receive the New Message is to receive its wisdom and its teaching about Self-Knowledge, purpose, relationship, unity, cooperation and humanity's emergence into a Greater Community of intelligent life in the Universe.

Take the New Message then and give it to your people, your nation, your tribe, your religion, and recognize the great forces that are threatening to undermine humanity's survival, freedom, and sovereignty within this world. There must be a new commitment to human freedom, unity and the preservation of the world. This commitment can only arise from the deeper knowledge that God has placed within each person.

Then you can be a Buddhist with a Greater Community awareness and commitment. You can be a Muslim with a Greater Community awareness and commitment. You can be a Catholic or a Protestant or practice any other religion or spiritual path that you have chosen, but with a greater perspective. For it is important to understand here that God does not seek to create a new religion but a new understanding, a new awareness and a new commitment. And these must reside within all of humanity's nations and religions.

However, there are some for whom the New Message will be their path and their way, and they will become its first recipients, its first practitioners. They will feel that they have been given what they have been looking for, which is a new way. For everyone else, the New Message gives humanity a greater

awareness, understanding, power and commitment that must be expressed throughout the human family.

Receive then the New Message. Bring it into your heart, your mind, your family, your community, your religious tradition, your nation and your understanding of the world, and you will have received the New Message from God.
