

***The
Key to
Superior
HVAC
Success***

Our proven technical expertise and operational excellence provide customers with accurate, reliable products for the HVAC Industry. Kele Precision Manufacturing reliability is second to none.

PROVEN

With 40 years of experience in sensor manufacturing, Kele Precision Manufacturing prides itself on quickly and economically producing quality temperature and humidity products and controllers.

Kele Precision Manufacturing Produces:

- **Custom control panels**-Ten day lead time.
- **Thermistor and RTD temperature sensors and assemblies**-High quality temperature sensors offered in housings for room, outside air, duct or immersion
- **Humidity sensors and probes**-Your choice of outputs and moisture ranges to match application
- **Power monitor**-Measures building power consumption with 8 parameter outputs
- **Transducers**- Our selection of inputs includes temperature, humidity, pressure, time, voltage, current, resistance, and flow. In addition, we offer an equally wide selection of outputs, control algorithms, channel counts, and packaging.
- **Gas monitors**-CO monitoring

Our Applications Engineering staff is available to work with you to evaluate your application and make recommendations for the best sensor and controls to meet your requirements. We understand sensors, probe design, high temperature packaging, and control electronics. We are eager to help you solve performance and cost challenges.

Committed to Quality

- Offer products and solutions using LEAN standards
- “Made in the USA”
- UL Approved
- ISO9001:2000 compliant
- NIST certification capabilities (accurate to 0.01°C)
