The Riser

Enables efficient use and processing
of surgical instruments

Before

After

- Eliminates use of disposable surgical towels in OR
- Perforated top ridge keeps instruments organized and in place
- Stainless Steel construction allows metal compatibility with instruments and minimizes bacterial attachment
- Available in any length

- Decreases set up time in OR and turnaround time in C.S.
- Keeps instruments open for quick and efficient decontamination
- Perforated construction allows for circulation of sterilant during sterilization process
- Reusable, saving money and minimizing impact on the environment
