

Delivering the Latest Decision-Support Chemical Information for the Global Environmental Health & Safety (EH&S) Community

ExPub—the leading provider of up-to-date chemical hazard information for EH&S professionals—is designed to help companies and agencies save time and money by providing a single platform for users to find the information they need on demand.

Optimized Information for Critical Decisions

Consisting of more than 120 databases, ExPub provides companies/agencies with access to millions of documents containing comprehensive human and/or environmental hazard data needed to manage the impact of chemicals in the workplace or on the environment.

Users are able to access the latest documents on chemical hazards and toxicology as soon as they are released from more than 100 sources, including:

-  U.S. Environmental Protection Agency
-  National Toxicology Program
-  National Library of Medicine
-  Agency for Toxic Substances and Disease Registry
-  National Cancer Institute
-  International Agency for Research on Cancer
-  European Union
-  U.S. Department of Defense
-  World Health Organization
-  And many other substantial government and licensed sources...

ExPub databases include essential information for emergencies like responding to fires, spills, or chemical explosions, as well as more day-to-day needs like creating and maintaining healthy and compliant workplaces. In addition, ExPub content covers more than 400,000 unique substances and accessible via 2.25 million chemical names and synonyms.

Who is ExPub Designed for?

ExPub databases are designed for organizations that need to research and understand the human health hazards associated with chronic and acute exposures to chemicals in the workplace and the environment. The databases can also be used by those responsible for developing chemical regulatory and trade policies and controls, and are of value to organizations tasked with homeland and facilities security and border control.

Customizing the ExPub Experience

ExPub offers a time-saving interface and enhanced organizational tools that allow each individual user to customize their own ExPub search platform for an optimal research experience.

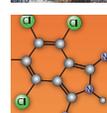

ExPub Toolbar — Allows users to search and access content through their browser without logging in

MyEXPERT — A customization tool lets users select and display only those resources they actually use, eliminating visual clutter from the screen and saving critical research time

ChemFlash™ — Sign up to receive the latest chemical newflash for EH&S professionals

Covering all areas of value to EH&S community, ExPub databases include:

 **ChemEXPERT™** — Continually-updated data on thousands of potentially hazardous chemicals

 **ReproEXPERT™** — Human reproductive risk data for EH&S professionals responsible for managing reproductive hazards in the workplace

 **ListEXPERT™** — Regularly-updated data on the over 100,000 chemicals included on hundreds of regulatory and advisory lists from around the world

 **DrugEXPERT™** — Environmental health & safety-oriented data on thousands of pharmaceutical substances

 **MSDSonline®** — Decision support when trying to understand and manage the impact of introducing new chemicals into the workplace

ExPub adapts to any work style, saving companies valuable time and increasing productivity — learn more at www.expub.com
