Libertec Solutions in Japan Signs Exclusive Distribution Agreement for JAMS Job Scheduler

15 March 2011 – MVP Systems Software, Inc., a leader in enterprise batch job scheduling and workload automation software, announced today that it has signed an exclusive distribution agreement with Libertec Solutions in Japan. According to the agreement, Libertec will be responsible for all MVP marketing, sales and support activities in Japan.

“We are excited to take our existing relationship with Libertec to the next level,” states Harry Reisenleiter of MVP. “Libertec has a proven track record of providing top notch service and support to its customers and we have already worked together on a number of successful engagements. Libertec also recently added personnel to their support team who have worked with our solutions at existing customer sites.”

As part of the agreement, Libertec will now have salespeople and support engineers dedicated to the MVP product line. MVP will be supporting this partnership with development resources as Libertec continues to aggressively grow its customer base in Japan.

“JAMS is the leading .NET enterprise job scheduling system on the market,” states Tony Teora, President of Libertec. “Keeping our customers’ requirements in mind, we looked at several solutions and JAMS is the best fit for organizations looking for cross-platform automation. We are looking forward to expanding our relationship with MVP and expanding the footprint of JAMS in Japan.”

About Libertec
