## MVP Systems Software Introduces New Users Support Forum at [www.JAMSSupport.com](http://www.JAMSSupport.com)

**8 March 2011** – MVP Systems Software, Inc., the leader in enterprise batch job scheduling and workload automation software, has introduced a new Users Support Forum. After filling out a simple registration form, JAMS users can post questions, tips or suggestions, or just browse the site. The forum not only answers common user questions, but will be used to announce new JAMS capabilities, and gather feedback from users on any needed improvements. The new community user forum can be accessed at [www.JAMSSupport.com](http://www.JAMSSupport.com).

“We are very pleased to offer this avenue of discussion to our loyal customers and end users,” states Rick Smith of MVP. “Our users are a very knowledgeable and engaging bunch and we look forward to participating in some lively discussions about our products, the current industry climate and the future needs of our customers.” The format of the JAMS Users Forum is easy to navigate, allowing users to find the topic threads they want to follow without delay.

Also new to [JAMSSupport.com](http://JAMSSupport.com) is an interactive Frequently Asked Questions section. The FAQs cover installation, troubleshooting, operation and compatibility issues. Specific application notes have been added for the most popular applications used with JAMS, such as Ecometry, SAP, JDE and SQL. The new FAQ section grew directly out of actual questions coming in to the MVP product support team.

### About MVP Systems Software, Inc.

For more than 20 years, MVP Systems Software, Inc. has provided leading-edge batch job scheduling and workload automation solutions to its more than 750+ customers. Customers include household names like JPMorgan Chase, Boeing, FINRA, Manulife Financial, Kaiser Permanente, The Hartford, and the US Postal Service. MVP’s solutions are delivered in traditional software as well as SaaS models.

### About JAMS (Job Access and Management System)

JAMS is the only job scheduling system built on a .NET framework. JAMS is the first enterprise job scheduling system that can be leveraged by both IT Operations Personnel and Application Developers. With its roots in Windows, JAMS also supports running processes across a variety of operating systems (UNIX, Linux, iSeries, OpenVMS, etc.) and applications (SAP, SQL, Oracle, etc.) To learn more about JAMS, please visit [www.JAMSScheduler.com](http://www.JAMSScheduler.com) or call 800-261-JAMS.
