ProRehab Outreach to Haiti Continues

Jacmel Clinic, Haiti

- * **Population of Jacmel: 50,000**
- * **Amputations in Jacmel: 1,000-1,500 & rising**
- * **Jacmel Clinic: 20-50 patients daily (65% Orthopaedic & 35% Neuromuscular)**

2009

For every patient who finishes PT treatment,
a t-shirt is sent to those in need in Haiti

ProRehab contributed shirts of encouragement signed by their patients.

2010

Post- earthquake ProRehab PTs travel to Haiti
to provide help along the long road of rehabilitation

"My recent trip to Haiti was an extremely rewarding and a truly worthwhile experience. I am happy that I was able to use my clinical skills and knowledge to help a population that had never had the opportunity of receiving OT and/or PT. The people of Jacmel were so appreciative and I feel blessed that I was able to have a positive impact on their overall quality of life.

- Travis Farhar, ProRehab
Occupational Therapist

build haiti better

Only 12 physical therapists are available to help the 4,000 to 6,000 people who lost limbs in the earthquake

Physical & occupational therapists are traveling to Haiti to treat & teach under
a sustainable solution that involves 4 strategies to "Build Haiti Better":

Acceptance: We work closely with & are embraced by the local medical community & political leadership.

Employment: We provide rehab technicians & support staff with jobs & stay in local guest houses paying fair rates for room & board.

Education: Our goal is for our rehab training program to become diploma granting. In the meantime, we teach as though it already is.

Healthcare: We provide free physical & occupational therapy & work with our partners who are providing medical care.
