

## elete CitriLyte Add-In

Nutrients for Hydration, Heat Tolerance, Muscle Function, and Energy Conversion

### Product Description:

**elete CitriLyte Add-In™** is a liquid, electrolyte concentrate comprising four essential electrolytes—sodium, potassium, magnesium, and chloride—plus zinc and citric acid. **elete CitriLyte** is formulated to support hydration, muscle function, energy conversion and heat tolerance and be used before, during, and after physical exertion and/or heat stress.

### Nutrition Facts:

- **elete CitriLyte Add-In** contains original **elete Electrolyte Add-In** with the added benefits of zinc and citric acid, which participates in the Krebs energy cycle, a.k.a. the citric acid cycle, for energy conversion.
- Electrolyte water made with elete contains sports-drink levels of electrolytes. Pure electrolyte water with **elete CitriLyte** has a hint of tart flavor, similar to a slice or wedge of lemon that makes tap water more palatable. When more **CitriLyte**, is added, the tart flavor increases to compensate for stronger mineral flavor.
- Better tasting for those sensitive to mineral flavor or when mixed with tap water that has a noticeable flavor
- Easier to mix by drop or squirt, no need for precise measuring
- Patent-pending formula; extensive product and field testing with athletes
- Provides an effective balance of the electrolytes lost due to physical exertion
- Provides, magnesium, the team captain of electrolytes, important for muscle function and nerve impulse transmission.
- No sugars, carbs, caffeine, artificial ingredients. Safe for diabetics and others with certain health conditions.

### SKUs and MSRPs:

- The refillable, 24.6-ml empty pocket flask: \$1.50
- 2 oz. refill bottle, 20 servings/5 gallons of electrolyte-fueled hydration, \$7.50
- 4 oz., 40 servings/10 gallons: \$12.50
- 250 mL (8.3 oz), 83 servings/20 gallons: \$18.50
- 32 oz., 320 servings/80 gallons: \$48.00
- 1 gallon (128 oz.), 1,280 servings/320 gallons: \$154 (measured pump sold separately, MSRP \$6)
