

Trusted by hospitals,
pharmacies, EHRs, EMRs,
clinics, physicians, labs
and more for life-critical
technology delivery.

Free Health Information Exchange

Meet “Meaningful Use” now with the GNAX, free health information exchange, a web-based, simple-to-use solution for the critical and timely exchange of healthcare records. This fully HIPAA compliant solution provides stability, scalability, security, usability and interoperability – all for free to all healthcare providers.

Healthcare Application Delivery

Offload your secondary applications like CPN, CDIS, BedMaster, Sigma Spectrum, EPSi and CBORD to GNAX, and we’ll ease your technical support headaches and lower costs. Focus your resources on your core services - we’ll take care of the rest.

HIPAA Compliant Solutions

GNAX can help set up your infrastructure so you never worry about down time again, ensure the best possible application performance and lower your costs dramatically.

- **Backup & Disaster Recovery:** *Is your infrastructure and critical data completely and properly protected?* GNAX can help set up an appropriate backup and disaster recovery plan that puts your mind at ease.
- **Cloud Services:** *What is the role of the cloud in healthcare?* GNAX can provide secure, enterprise-class cloud solutions that improve performance, enable agility and lower costs.
