EMR WorkStation™

The EMR WorkStation™ is designed as a convenient and secure location to house a computer workstation for medical staff to access electronic medical records.

The door functions as a work surface when folded down, and folds up with ease making it ideal for high traffic areas. Door design incorporates compartments for the keyboard and mouse, keeping them in place when the door is closed.

Both compartments lock for the utmost in security.

- Main unit features an auto-locking code lock to prevent unwanted access to electronic medical records (HIPAA)

- Accommodates up to 24" monitor, a keyboard and mouse in the main compartment, and a CPU in the adjacent compartment

- Units can be mounted side by side for easy cable hook ups between CPU and accessories

- Both compartments feature grommet holes for improved cable management

- The CPU unit features a removable door for easy access and a key lock to secure CPU configurations by IT staff

- Textured powder coated finish, available in 19 standard colors, not only protects the unit but prevents fingerprinting and reduces glare

- All edges of the work surface and fold down door are smooth to prevent snags on clothing or injury to user
