

ROCKLER MAKES CREATING A SOLID WORK TABLE SIMPLE

Patent-pending Supports Provide a Strong Foundation for Sawhorse Workbenches

MEDINA, MN (April 05, 2011) - Rockler Woodworking and Hardware is making it faster and easier to build a solid and stable work table that has long term dependability. Patent-pending Sawhorse Supports are substantial steel brackets that slip over sawhorses, allowing additional 2 x 4 support inside the sawhorses. With one or more Sawhorse Supports in place, add 2 x 4s of any length to create a stronger, more stable base for a work table. Add a sheet of plywood on top for a solid work space, creating anything from a portable assembly table or sturdy base for a miter saw to a contemporary, "industrial-style" table for your living space.

Without Sawhorse Supports, a sheet of plywood placed on a pair of saw horses is prone to dip or sag in the middle. Sawhorse Supports eliminate that problem by giving additional support right where the table needs it most, in the middle. By making a table much more stable and safer to use, Sawhorse Supports transform ordinary sheets of plywood or inexpensive hollow-core doors into a:

- Solid off-the-ground base for your miter saw
- Spacious work/assembly area
- Base for a contemporary, "industrial" table
- Create a customized work desk with a painted or stained top
- Picnic table for large family outdoor gatherings
- Showplace for hobbies like train building, race tracks, doll houses, and diaramas
- Large display area for a neighborhood yard sale

Sawhorse Supports may be affixed in place permanently using screws or nails. Or remove them after use for easy storage and mobility.

Sawhorse Supports (# 41427) retail for \$12.99 and are available at Rockler Woodworking and Hardware stores nationwide, Rockler's independent resellers, Rockler.com, or in the Rockler catalog. For store locations or a free catalog, please visit www.rockler.com or call 1-877-ROCKLER.
