

SchoolKit Wins Two BESSIE Awards with TechSteps and pd21

SchoolKit wins twice in "ComputeED GAZETTE's" 17th annual Best Educational Software Awards. This prestigious awards program honors innovative and content-rich programs and websites that provide parents and teachers with the technology to foster educational excellence. TechSteps, a K-12 technology literacy curriculum and assessment solution receives its first BESSIE Award for best Multi-Level Technology Literacy Integration Website. pd21 wins its first BESSIE in the category of Teacher Tools: Professional Development Online Course.

SchoolKit, a leading provider of rigorous and relevant 21st Century education solutions, is committed to providing teachers with the tools and resources to easily and effectively integrate technology and 21st Century learning into every classroom.

"These awards recognize our commitment to districts and states in providing educators with tools and resources to meaningfully integrate technology to promote innovative teaching and learning for 21st Century success," says Adam Smith, CEO of SchoolKit.

In a featured review of selected award-winning entries, the ComputeED GAZETTE applauds TechSteps for "combining more than one subject into a truly integrated lesson. And these aren't make-work projects—TechSteps uses 'real-world digital tools' to solve 'real-world' problems. Integrating technology and core curriculum isn't a new idea, but SchoolKit has created an accessible and user-friendly website for technology integration that can be utilized by any educator."

Aligned with Common Core, ISTE NETS*S and State Standards, TechSteps easily and effectively infuses technology skills into core instruction, promoting core subject area outcomes while also teaching skills for 21st Century success. This proven approach allows educators to teach and assess technology literacy in an integrated and systematic manner, while generating data for authentic performance-based assessment and reporting purposes.

pd21 is a flexible, online K-12 professional development system for educators that guides teachers in seamlessly integrating technology and 21st Century instruction into a standards-based lesson design process to meet curriculum goals and maximize learning. A supplemental library of inquiry-based, classroom-ready activities simultaneously enrich standards-based instruction in K-12 Math, Science, Language Arts, and Social Studies while also providing an opportunity for professional learning to immediately impact student learning.

"These awards are quite an accomplishment," Smith comments. "We are pleased to see that innovative, project-based approaches to teaching and learning are being recognized."
