

## Viva CE Finder™

The Viva CE Finder™ (CEF) is a Learn HealthSci search engine designed to display search results with links that connect web visitors to a broad array of continuing education content that is available through the Viva e-learning network. Currently available are over 150 hours of CE on-demand webinars, 75 product tutorials and, on average, 8-10 upcoming live CE webinars.

The CEF is designed to be placed on any website (Hosting Site), requiring one dedicated page. The CEF can be configured to show search results and links that fit the needs of the Hosting Site. Search result links will connect visitors to the appropriate Viva CE pages for on-demand CE webinars and registration for upcoming live webinars.

For 2011, we anticipate over 150 hours of new CE webinars to be added to the CEF. **This is a tremendous value-add for your web visitors, as dental professionals continue to search for premium, relevant clinical CE at no cost! All CE is FREE.**

If you are interested in participating in our CEF Hosting Program, please contact Phil Klein for more information.

[pklein@dentrek.com](mailto:pklein@dentrek.com)

858-558-9900 ext 11.

Currently the CEF is free to all Hosting Sites that sign up for 2011.

**\*Viva CE Sponsors included in CE Finder as of 3/1/11:**

3M ESPE, 3M Unitek, Dentsply, DentalEZ Group, GC America, Heraeus, Kerr,Ormco, Pentron, Premier Dental, SDI, VOCO, Cadent

**CE Finder sites as of 3/1/11:** Schein, Patterson, Burkhart, Goetze, Iowa, DHPI, SmartPractice, Darby, Atlanta

Hosting Sites can configure their CEF to show any of the above CE sponsored content.

*Example of CEF is shown on next three pages.*

With only a few lines of provided code, the CEF appears within an allocated space on the Hosting Site. Below is an example:

(No charge for this webinar)

Modern dental adhesive techniques have become an integral part of preventive, operative and prosthetic dentistry. However the mechanisms of action for adhering tooth colored restoratives to mineralized structures are complex and require careful clinical application. This Webinar will discuss the latest information on total-etch and self-etching adhesives for direct restorative procedures and indirect

Visitors can perform specific searches and results/links will appear:
