Cheap Website Design, Hosting and Web Maintenance for Small Business in Australia

CMather and Bendigo Web Hosting, the small business web developer based in Australia, now provides its [web designing](#) services to the entire Australian continent and has expanded its services and business directory to over 18 countries.

“It is not enough to have a good business idea. In today’s world, every business needs to plan strategies to reach out to a global audience, and that’s what these websites help them to achieve. With our minimal website package, entrepreneurs get online visibility at a very low price, and get a considerable ROI,” says Chris Mather, Group Operations Officer, CMather and Bendigo Web Hosting.

Known for our [web hosting](#) and [website maintenance](#) services, our company has now added [website design and development](#) to its list of services. Our business has carved a niche for itself in small business website design. We offer website design using a DIY site builder package at no cost to our customers. Along with these new services, we continue to provide services such as website maintenance and script installation for all kinds of small businesses.

Along with our assortment of web design and development services, CMather and Bendigo Web Hosting also provide clients with various ways to reach out to a global audience. We have introduced a new online [free classified](#) and [business directory](#) where people can post their business information for free. This information will be available online, and will provide functionality for search, social media integration, picture upload, private contact, SEO optimised listings and more.

Right now, CMather and Bendigo Web Hosting are busy providing websites for hundreds of small businesses worldwide. The major chunk of our clientele includes startup business with limited budgets who want to enhance their business with an online presence, and thus get more prospects.

Web Hosting and Website Design

CMather and Bendigo Web Hosting have outlined a process by which it can produce a simple one-page website, like a business card, within 24 hours. These mini websites are fashioned so that businesses can get started quickly with little to no cost. The websites are compliant with several current web design technologies and have added features that help them to expand as the businesses keeps growing.

“We realise that small businesses need our services the most. These are businesses with a great idea, but find themselves restrained because of their low startup budgets. Our company offers them simple but fully functional websites that help them enhance their prospects and get right into the middle of the game,” says Chris.
