

TESTSTORM from CLOUDONE®

Test your software. Not your patience.

It's a simple concept, really. In order to build flawless applications, you need a flawless testing environment. Problem is, to create such an environment you've traditionally had to invest huge sums of money.

That ends today.

Introducing **Performance and Load Testing from the Cloud** with **TestStorm from CloudOne**. It's a complete cloud-based performance testing offering that's simple, reliable, flexible and – yes – absolutely affordable. By delivering industry-leading tools via the cloud, we've made performance testing more accessible and convenient than ever before.

From project start to project finish, it's the only resource a QA pro will ever need.

Seriously.

CloudOne

DEVELOP HIGHER

OnCloudOne.net

CloudOne is the leader in lifting software and systems development on to the Cloud.

We elevate development team collaboration through secure Virtual Private Clouds, available at anytime to everyone, everywhere. We boost cost savings by filling Clouds dynamically with market-leading IBM Rational development tools through Software-as-a-Service. And, we raise productivity and quality through our CloudOne Consortium partners. Learn more at <http://OnCloudOne.net>.

Fast

Speed is a by-product of efficiency: depending on the number of users you want to simulate, we can **often complete your test within 24 hours**. But the efficiency of working with CloudOne goes beyond our technology: we eliminate the hassle of the major-vendor procurement process, giving you back a week or more. Plus, eliminating purchases of hardware and networks saves you even more time.

Flexible

CloudOne has a wide range of testing capability that mirrors your needs. Our clients have confidence in testing their web and server-based scalability in increments ranging from 50 to 500,000 virtual testers. We support load testing against a broad range of applications, **including HTTP, SAP®, Siebel®, SIP, TCP socket and Citrix®**. We also enable Windows®, Linux® and mainframe technology-based test execution.

Proven

A major university needed to test their new student enrollment system, but didn't have the budget or the time to buy all the needed hardware and software. CloudOne provided them its their virtual private cloud for 35 days, pre-configured with IBM® Rational® Performance Tester™, and enough hardware and network capacity to simulate 5,000 users. Our partner RTTS provided skills in setting up, executing and reporting on the performance. The results: **A happy customer with a tested enrollment system and a savings of over 70%.**
