

Bond International Software Releases VCG Pointwing XML Share Integration to Microsoft Dynamics® GP (Great Plains) for Contingent Staffing Payroll and Billing

Bond VCG Pointwing recruiting software with XML Share capability pushes relevant data to Microsoft Dynamics® GP (Great Plains) for contingent employee payroll processing and customer billing to streamline accounting workflow and reduce data entry errors.

Atlanta, GA, April 20, 2011. [Bond International Software](#) announced today that the latest version of [Bond VCG Pointwing 3.1](#) enables recruiting and staffing firms to use Microsoft Dynamics GP (Great Plains) as their accounting solution for handling contingent employee payroll and client billing.

The Pointwing XML Share functionality can automatically push all relevant customer account and contingent employee data from their recruiting and staffing software to their back office accounting Microsoft Dynamics GP. As a result, recruiting and staffing firms will benefit by:

- Speedily paying their contingent or contract employees and billing their customers for services through Microsoft Dynamics GP
- Reducing interruptions to their front office recruiting and staffing workflow by automating data transfer from Pointwing to Microsoft Dynamics GP
- Eliminating time-consuming double entry of data, which also reduces errors

Pointwing XML Share offers staffing and recruiting firms a solid foundation for future integrations to other applications. All data is sent from Pointwing based on [HR-XML](#) standards for human resources-related data interchange, a sub-set of XML. Thus, Pointwing assures interoperability standards between its Microsoft SQL-based database and Microsoft Dynamics GP or any other XML-standards-based software package, such as the previously delivered integration to Intuit® QuickBooks®.

Steve Taylor, President and CEO of Bond VCG, said “Pointwing’s software integrations enable recruiting and staffing companies to work more efficiently with other best-of-breed applications. Using established XML and HR-XML standards as the foundation for Pointwing XML Share, we assure our customers that our integration to Microsoft Dynamics GP works to their success.”

Bond VCG Pointwing is a modular recruiting software suite that accelerates the process of finding and placing the people most likely to thrive and streamlines unique business processes to improve productivity, control costs and manage margins. For more
