- Unreliable Service
- Security

Solution

Silver Networks Q-Box

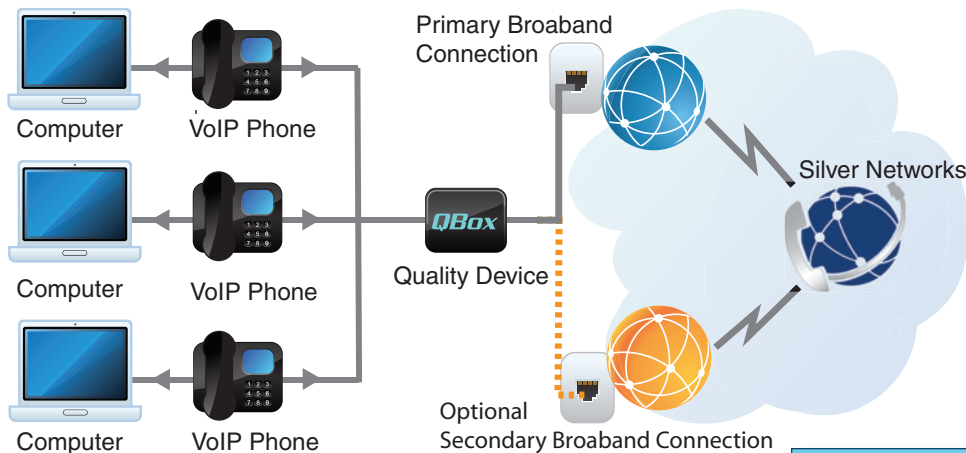

Advanced Features**

- 128 Bit Encryption
- Fail-Over
- Load Balancing
- Load Sharing
- Prioritization

** available for an additional charge

Benefit

- No outages
- Crystal Voice Quality
- Fail-Over Solution
- Security Encryption
- Communications Continuity

QBox Features

- Call Clarity
- Constant Connectivity
- Quality Guarantee

How it works!

Simply plug in the Q-Box to your existing broadband connection(s) (T1, Cable, DSL, WiMAX, etc.). We establish a private secure link between the Q-Box and our data center allowing us to provide you with unbroken crystal clear voice quality. With an optional secondary Internet connection, we can create a complete fail-over solution.

"Phones are really important to my business. With the Silver Networks Q-Box, I can save money by using my existing cable broadband internet and I'm free from the fear of bad phone service."
