netfast ® Optimize IT.

Netfast At-A-Glance

About Netfast
With over 15 years of technology expertise, Netfast provides advanced technology solutions to enhance the performance and optimize the cost of information technology assets. Netfast Solutions Architects and Engineering Teams possess over 40 IT certifications in optimization solutions. Our cost optimization solutions include virtualization, cloud computing, data center consolidation and back-up and disaster recovery. Performance optimization solutions include WAN optimization, designing and building high performance multiservice networks. Our objective is to provide the best of class solutions which meet the requirements of our clients.

Strategic Partnerships
Netfast is proud to partner with some of the leading technology manufacturers to provide our clients with hardware and software designed to create the best in high performance networks. We are proud to partner with the following manufacturers:

- F5 ■ Silver Peak ■ Alcatel-Lucent ■ HP

- Brocade ■ Dell ■ Force10 ■ Fortinet

Netfast Value Add

- Focused solely on IT Performance and Cost Optimization Solutions

- Specializing in the design and roadmap architecture to consolidate & migrate enterprise data centers

- OEM Certified Engineering Team with over 40 IT Certifications

- ITIL Certified IT Services Manager

- 97.6% client satisfaction rate

- Large facility for procurement, logistics, testing, staging and deployment of equipment

Primary Service Offerings:

IT Performance & Cost Optimization
Netfast Technology Solutions can provide your organization with a detailed plan to help maximize IT performance and apply optimization solutions to your network infrastructure that will deliver cost and risk reductions. Our proven methodologies create a roadmap that, when implemented, will result in an improved IT operating structure.

Storage & Server Virtualization
Storage Virtualization is critical for ending the problems created by haphazard storage growth. By creating a logical storage plan, Netfast can efficiently allocate capacity needs across all applications and users. With Server Virtualization, companies can consolidate applications onto a smaller number of servers rather than individual machines, therefore dramatically improving hardware utilization.

WAN Optimization
WAN optimization technologies have been created that are specific to requirements of each type of environment. Netfast Technology Solutions has the knowledge and expertise to evaluate, advise and implement a WAN Optimization solution to best fit your organizations needs.

Cloud Computing Solutions
Cloud computing can be an effective tool in offering remote accessibility, ease of infrastructure expansions, elimination of data loss and reduction in costs. Let Netfast analyze your IT infrastructure and present your organization with recommendations on an ideal cloud computing solution.
